DRAFT RULES.

Under the provisions of Section 18 (1) of Act XV of 1881 (The Indian Factories Act) as amended by Act XI of 1891, the Hon'ble the Lieutenant-Governor is pleased to make the following rules for the better control of factories situated within the limits of the Punjab and its Dependencies, in supersession of the rules published with *Punjab Government Gazette* Notification No. $\frac{998}{4660}$, dated 24th September 1883 :—

1. The terms "factory," "child," "mill-gearing" and "employed" when used in these rules, or in any supplementary rules that may hereafter be made under the Act, shall have the meaning given to them in the Act. "Inspector" means the District Magistrate. "Joint Inspector" means an Inspector appointed by the Lieutenant-Governor under Section 3 of the Act. "Occupier" means the Manager and includes the person for the time being actually in charge of a factory.

2. Every Joint Inspector shall be subordinate to the District Magistrate for the carrying out of the Factories Act and rules under it.

3. Each Inspector shall keep a register of all factories within his jurisdiction in the Form A attached to these rules.

4. On the publication of these rules, the Inspector shall send, through the post under registered cover, a notice to the occupier of every factory within his jurisdiction intimating his intention of placing such factory upon his register of factories.

5. Any person served with a notice under rule 4 who considers that his permises do not fall within the definition of a factory given in the Act may, within 15 days of the receipt of such notice, forward to the Inspector a statement setting forth his objections to the registration of his premises as a factory.

The Inspector shall consider and dispose of such objections after making such enquiry as he may deem necessary, and shall make up his register of factories in accordance with the provisions of the Act.

6. The Inspector may at any time serve a notice, as provided in rule 4, upon the occupier of any factory which is not already entered in his register of factories; and the provisions of rule 5 shall apply to the subsequent proceedings in all such cases.

7. When any premises cease to be occupied as a factory, the occupier may give notice of the fact to the Inspector who shall, if satisfied that the Act is no longer applicable to such premises, remove them from his register of factories.

8. Every factory shall be inspected by the Inspector or Joint Inspector as often as they may deem sufficient, but not less than twice in each calendar year, and at each inspection the inspecting officer shall muster all children employed on the premises, examine all registers required to be kept under the Act, and see that all orders respecting the secure fencing of machinery are being duly carried out. The Inspector or Joint Inspector may take with him as assistant or assistants any person or persons whom he may deem qualified to give a professional opinion as to the secure fencing of machinery and mill-gearing.

9. The Inspector shall keep a register of his inspections of each factory in the Form B appended, in which he shall record all orders and remarks made by him on each occasion of his inspection. When a factory is inspected by a Joint Inspector his orders and remarks shall be recorded in the Inspector's register.

10. A copy of every entry made under rule 5, and of every order passed by an Inspector or Joint Inspector under Section 4 (*c*) or Section 12 (*c*) of the Act, shall be furnished without delay to the occupier of the factory concerned. The despatch, through the post under registered cover, of the copy of such order shall be deemed to be sufficient service on the occupier of the factory of any order therein contained.

11. The occupier of a factory shall, if required by the the Inspector or Joint Inspector, bring before him, on the occasion of any inspection, all children employed in the factory and any other persons in the service of such occupier whom the Inspector or Joint Inpector may wish to see.

12. Every order for the fencing of any part of the machinery or mill-gearing of a factory which an Inspector or Joint Inspector may pass under Section 12 (*c*) of the Act shall state clearly what is required, so that the said machinery or gearing may be securely fenced, and shall specify a reasonable time within which what is required to be done shall be completed, and shall further give notice that if it shall not be so completed, the person responsible for the breach of order will be prosecuted under Section 15 of the Act.

13. An appeal shall lie to the Commissioner of the Division from every order of an Inspector or Joint Inspector made under rules 5, 6 and 16 of these rules, or of an Inspector or Joint Inspector under Section 12 (*c*) of the Act. Such appeals must be submitted in writing within 15 days of the order appealed against; and the Inspector shall forward each such appeal to the Commissioner within 7 days of its presentation, with any remarks or explanations he may see fit to make. The Commissioner shall, on receipt, fix a day for disposing of the appeal and give due notice thereof to the appellant. Provided that appeals against orders passed by an Inspector or Joint Inspector, under rule 16 or Section 12 (*c*) of the Act, shall, when such order relates to a Railway workshop, lie to the Consulting Engineer for Railways. No appeal will lie from the order of the appellate authorities, but Government may review any order mentioned in this rule either of an Inspector, Joint Inspector or an appellate authority, and may issue any orders thereon which may seem proper. In order that effect may be given to the latter part of this rule, copies of all the orders referred to therein shall be transmitted to Government as soon as they are passed.

14. Notice in writing of all accidents resulting in death, or from which the injury is evidently so severe that there is no reasonable hope that the injured person will be able to return to his work within 48 hours, shall be given on the same day on which the accident occurs. Notice of accidents of a less severe character, but which nevertheless prevent the person injured from returning to his work within 48 hours of their occurrence, shall be given immediately on the expiry of the 48 hours' interval allowed by Section 13 of the Act. Such notice shall contain full information as to the nature and cause of the accident, and shall be sent by the occupier of the factory to the Inspector within whose jurisdiction such factory is situated.

15. Occupiers of factories in which children are employed shall maintain a register of such children in the Form C attached to these rules.

16. Every Inspector and Joint Inspector shall take measures to ensure in the case of every factory within his jurisdiction—

(1) that all machinery and mill-gearing is properly fenced;

(3) that the factory is properly ventilated and its sanitary condition satisfactory;

The 9th March 1892.

No. 122.—*Notification.*—The following circular of the Government of India, in the Revenue and Agricultural Department, No. 4 F., dated 13th February 1892 (with appendix), relating to the grant of concessions to selected Forest Officers who desire to utilize their furlough in studying Forestry in the Forests on the Continent of Europe, is published for general information :—

CIRCULAR NO. 4 F.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department, (Forests),—dated Calcutta, the 13th February 1892.

READ—

Circular Resolution No. 20 F., dated 2nd September 1867, specifying the conditions under which Forest Officers on leave in Europe may study Forestry.

RESOLUTION.

IN view of the importance of maintaining in the Forest Departments of India a continuous knowledge of the Forest systems of Europe, and for the purpose of encouraging the study by their officers of Continental Forestry, the Government of India have, with the concurrence of Her Majesty's Secretary of State, decided that the privileges set forth in the rules appended to this Resolution may be granted, with their previous approval in each case, to selected officers of the Forest Departments when on furlough.

2. The improvement of State Forests in India has depended, and will for some time continue to depend, in no small measure, on the adaptation to them of scientific principles borrowed from France and Germany. Under existing arrangements, candidates selected for the Indian Forest Service undergo a preliminary course of practical instruction, for a few weeks, in the forests of either France or Germany; but progress in forestry is on the Continent so rapid that the knowledge which they acquire during their comparatively short tours, and at a time when their practical acquaintance with the subject is only commencing, is found to be insufficient for the needs of forest administration in India. It has therefore been determined to give facilities to officers, who have proved, by the merit of their work in India, that they are capable of assimilating and turning to account useful knowledge, to study forestry on the Continent when absent from India on furlough. Such officers, if carefully selected, would, it is confidently anticipated by the Government of India, be enabled, both by their special capacity and their practical experience of what is required in India, to bring back with them and introduce into Indian forest administration the most important improvements of the continental systems which may be applicable to this country, more especially in connection with the preparation and control of Working-Plans, in which exceptionally technical branch of forestry the greatest advance has recently been made in the Forest Departments of the Continent.

ORDER.—Ordered, that a copy of this Resolution, with its appendix, be forwarded, for information and guidance, to the Governments of Madras and Bombay, and the Local Governments and Administrations noted in the margin; also to the Foreign Department for communication to the Agent to the Governor-General in Baluchistan.

APPENDIX.

Rules under which selected officers of the Forest Department in India may be authorized to study during furlough, at the public expense, forest operations on the Continent of Europe.

I. A Forest Officer desirous of obtaining permission to study forestry on the Continent, under these rules, must submit an application, through the Conservator under whom he is serving, to the Local Government.

II. The Local Government will forward the application to the Inspector-General of Forests, with the remarks of the Conservator and its own recommendation in the case.

III. The Inspector-General of Forests will submit the application to the Government of India for orders.

IV. The Government of India will require to be satisfied that the officer applying is likely to profit by the additional experience which he will gain by Continental study, and that he possesses a sufficient knowledge of the language of the country which it is proposed that he should visit.

V. The application must reach the Government of India not less than four months before the date on which it is proposed to commence a Continental tour.

VI. If the application is sanctioned, the officer should place himself in communication with the Inspector-General of Forests, under whose instructions the plan of study proposed will be arranged.

VII. On arrival in England the officer will report himself at the India Office ; and it will then be decided by Her Majesty's Secretary of State what localities he is to visit.

VIII. The total period to be spent on deputation will not, as a rule, exceed six months. At the end of that period the officer selected will submit to the India Office a diary showing how his time has been spent, and a report which should indicate fully the nature of the operations studied, and which should also include suggestions as to the application of such operations to India. The Secretary of State will decide whether the diary and the report show that the time of the officer has been properly employed, and will determine accordingly for what period the daily allowance admissible under Rule IX may reasonably be granted.

IX. Each officer will be paid, through the India Office, the cost of a 1st class return-ticket between London and the place to which he may be initially deputed, and will also, subject to the preceding rule, be granted a daily allowance of 10 shillings during his stay in the Continental forests. Travelling allowance bills in full detail must be submitted to the Revenue Secretary at the India Office.

X. The reports, notes, and drawings submitted by an officer may not, without the previous permission of the Government of India, be communicated to any professional journal or institution ; and the Government of India will be at liberty to print, publish or circulate them should they think fit to do so.

GOVERNMENT OF THE PUNJAB,

PUBLIC WORKS DEPARTMENT, IRRIGATION BRANCH.

Resolution by the Hon'ble the Lieutenant-Governor of the Punjab and its Dependencies, dated Lahore, 4th March 1892.

READ—

Letter No. 403 I., dated 15th February 1892, from Superintending Engineer, Cis-Sutlej Circle, forwarding reports on the working of the drainages in the Karnál and Delhi Divisions, Western Jumna Canal, during the year 1891.

RESOLVED.—That the progress made in the opening out of these drainages has been most rapid and creditable to the Canal and Civil Officers concerned and to the Delhi District Board, which has set an excellent example in carrying out

drainage works now that the ground has been cleared by the remodelling of the distributary system of the Western Jumna Canal. The Sheikpura, East Jua and Mangashpur drains have all been carried out at the cost of the District Fund, whilst the Nangloi drain and other petty works under construction are also chargeable to that fund, and the Board propose to sanction further works of the same kind.

The result of the works constructed is shown in these reports to be most marked and satisfactory, large areas formerly swamped being now available for rabi cultivation.

The thanks of the Local Government are due to Mr. Lionel Jacob, Executive Engineer, Delhi Division, Western Jumna Canal, for the energy, tact and judgment displayed by him in framing and carrying out the detailed projects for this drainage system which has now been to a great extent completed with the most satisfactory results.

The thanks of the Local Government are also due to Mr. R. Clarke, C.S., Deputy Commissioner of Delhi, for his hearty co-operation with the Executive Engineer and for the sustained and active interest that he has takan in all questions connected with the improvement of the drainages of the Delhi District.

His Honor the Lieutenant-Governor also notes with great approbation the interest taken by the Delhi District Board in the furtherance of these drainage projects which will be of incalculable benefit to this District.

MITITARY.

The 22nd March 1892.

No. 87.—Notification.—The following revised Regulations for Volunteer Reserves in India and Burma issued by the Government of India, in the Military Department, are published for general information:—

VOLUNTEERS.

RESERVES.

Revised Regulations for Volunteer Reserves in India and Burma.

His Excellency the Governor-General in Council is pleased to notify the following revised regulations for the guidance of volunteer reserves in India and Burma.

These regulations will form section XXII of army regulations, India, vol. IX:—

SECTION I.

Constitution and formation of corps.

1. Volunteer reserve corps will consist of Europeans or those of European descent, who, from various causes, are unable or unwilling to enlist in active volunteer corps.

2. For the formation of volunteer reserves, each presidency may be divided into volunteer districts according to the localisation of existing volunteer corps. Men living near each other may be formed into one or more "squads" of not less than five and not more than fifteen men. All "squads" near each other may be formed into one or more "sections" of not less than fifteen and not more than twenty-five men. On the same principle "half-companies" of not less than twenty-five men, and "companies" of not less than forty men, may be formed. The companies thus formed in each volunteer district may be attached to the volunteer corps in the district, or be formed into separate reserve volunteer corps, as may be decided by the local government.

3. No commissioned, warrant, or non-commissioned officer of the regular army will be eligible for enrolment in the volunteer reserve in any rank if he has any connection at the time with purely military duties. This restriction does not apply to the employment of military officers who may be selected by government for the post of commandants or adjutants.

4. Honorary commissioned officers and warrant and non-commissioned officers and men on the unattached list, if not employed on purely military duties, and army schoolmasters, are eligible for enrolment in a volunteer reserve corps, on a certificate from the officer under whom they are serving that their being volunteers will not interfere with their duties; but none of these ranks, except honorary commissioned officers, will be eligible for appointment as commissioned officers. The certificate above referred to will not be required in the case of military men employed as clerks.

5. Members of the police force may be enrolled as reservists, but they are not eligible to hold any rank above that of private, unless permitted by the local government or administration.

6. Out-pensioners of Her Majesty's regular forces, residing in India, may be enrolled as reservists.

7. Where active volunteer corps exist, and no special reason presents itself to the contrary, the reserves raised in the locality will be attached, for administrative purposes, to the active corps, so that the reservists may derive full advantage from the instructional staff, ranges, and appliances belonging to the active corps. Should the reservists desire to form a separate corps, the question will be referred to the Local Government or administration concerned for decision. If an additional separate staff is found necessary for a reserve corps, the Government of India will be prepared to consider recommendations on this head. Where there is no active volunteer corps in the locality, the organisation of the volunteer reserve will partake of a territorial character, and will be conducted by the divisional and district civil officers, with the assistance of any instructional staff it may be found necessary to sanction.

8. Applications for the formation of volunteer reserves will be submitted for the orders of the local government or administration. If a separate corps be formed, the designation of such corps will be fixed by the local government or administration, and no corps will be permitted to assume any title or designation without such authority.

9. In the formation of volunteer reserves, care is to be taken that the ranks of the active corps are not depleted by indiscriminate recruiting. Recruiting for reserve corps will therefore be carried on under the following conditions:—

(*a*) All persons who, on account of their age, the nature of their business, residence at a distance from a volunteer centre, or other cause, cannot join an active corps, may be enrolled in the reserve. A liberal interpretation should be put by commanding officers on this rule.

(*b*) No member of an active volunteer corps shall be transferred to the reserve without the permission of the officer commanding the active corps, unless the member has attained the age of 35 years and is an efficient volunteer. In the case, however, of railway volunteer corps, a member, if he be a railway employé, can claim a transfer to the reserve only after he is 47 years of age and is efficient.

(*c*) The sanction of the officer commanding the active volunteer corps to which the reserves are attached will be necessary before a candidate is enrolled in the reserve, unless the candidate has attained the age of 35 years, when such permission shall not be required.

(*d*) No candidate will be admitted into the reserve without the sanction of the officer commanding the reserve corps.

(*e*) Applications for the sanction of the officer commanding the active corps for the enrolment of a candidate in the reserve must be made in the form given in Appendix A (*vide* page 138).

10. Prior to enrolment in the reserves, it should be made clear to the applicant that his obligations will be as follow, and he will be required to sign a declaration in the form given in Appendix B (*vide* page 138):—

1st—He shall maintain in good order (if in his possession) his rifle, ammunition, and accoutrements.

2nd—He shall attend, in cases of emergency, when summoned by the chief civil authority of the district, or commandant of the corps to which he is attached, or the senior member of the reserve on the spot.

3rd—He shall deliver his arms and ammunition in good order (reasonable wear excepted) to the authority appointed to receive them on leaving the volunteer district or resigning his membership.

4th—He shall notify to the regimental authorities all changes of residence.

11. All persons enrolled as members of the volunteer reserve shall be subject to the provisions of Act XX of 1869, and to such orders in accordance therewith, or not opposed thereto, as may from time to time be issued under the authority of the Governor-General in Council.

12. Where reservists are attached to active volunteer corps, they will not be formed into separate corps, but will be formed either into companies, sections, &c., to be called reserve companies of the corps to which they are attached, or they may be simply attached to the various companies. Where, however, the reservists are not attached to existing active corps, but form corps by themselves, the corps will be divided into companies, half-companies, and sections, according to postal or municipal districts, according to their place of residence or place of employment, as they may elect.

13. No person shall be enrolled in a reserve volunteer corps who has been dismissed from any volunteer or reserve corps under the provisions of section 18 or 20 of Act XX of 1869.

14. If a person, who has been enrolled as a reservist because his residence was remote from a volunteering centre, changes his residence to a place which is, or is near to, a volunteering centre, he shall be invited to join the active volunteer corps and shall not be permitted to remain a reservist, unless he shows good and sufficient reasons why he cannot join the active corps.

15. A person who is already a member of a volunteer reserve corps is ineligible for enrolment in any other reserve corps until struck off the strength of the corps to which he belonged. Reservists temporarily absent from their own corps may be attached to any other.

SECTION II.

Establishments.

16. Officers of volunteer reserves will be appointed by the local governments or administrations, and their appointments and promotions will be notified in the local gazettes. Commandants and field officers will be selected by the local government or administration, all other officers being elected by the reservists and approved by the local government or administration. Officers will be granted commissions by the local government. Only one commission will be issued to an officer of the volunteer reserve on first appointment, and any promotions he may subsequently receive will be notified in the local gazette, and he will be entitled by virtue of his commission to hold and exercise the rank to which he has been so promoted.

16A. Officers of the volunteer reserve force are not eligible to command officers of the active volunteer force.

17. Officers who have held commissions of a lower grade in the army or volunteer force may be promoted, on joining the reserves, to a higher grade.

18. Every officer appointed to a commission as subaltern, captain, or field officer in the volunteer reserve, or promoted under rule 17 to be a captain or field officer in the reserve, will be required to pass, if he has not already done so, the examinations laid down in army regulations, India, vol. IX, "Volunteers," for the respective commissioned grades.

19 Sections, half-companies, companies, half-battalions, and battalions of reserve volunteers will be officered in the same proportion as sections, &c., of active volunteer corps, *viz.*, as laid down in para 45, army regulations, India, vol. IX, "Volunteers."

20. The establishment of non-commissioned officers for reserve volunteer corps will also be in the same proportion as that laid down for active corps, namely, as in para. 45, army regulations, India, vol. IX, "Volunteers."

21. Non-commissioned officers are to be appointed, on the recommendation of officers commanding companies, by the commanding officer of the corps from among the enrolled members.

22. The adjutant of the active volunteer corps in the locality will exercise the supervision necessary for the drill and instruction of the reservists, and where the strength of the reserve corps justifies the appointments, government will be prepared to receive applications for the services of sergeant and drill instructors for the reserve corps. The sergeant instructor so appointed will be required to perform the office work of the corps.

23. Instructors appointed to reserve corps will be subject to the rules applicable to instructors of active volunteer corps, *viz.*, those contained in section VIII of army regulations, India, vol. IX, "Volunteers."

24. The rules contained in section V of army regulations, India, vol. IX, "Volunteers," concerning officers of volunteers, will apply to officers of volunteer reserves, except when those regulations are not in accordance with the provisions of the present rules.

25. All proposed resignations of officers of reserve volunteer corps will be submitted through the usual channel to the local government for acceptance.

SECTION III.

Arms, Ammunition, Equipment, &c.

26. Reservists will be armed with Martini-Henry rifles, and each man will be eligible to receive fifty rounds of ammunition annually *gratis*. Extra ammunition, up to a maximum of fifty rounds annually, may be purchased by reservists for practice or match-shooting at half price. The rules contained in India army regulations, vols. III and IX, regarding the issue of ammunition and return of empty cases, are applicable to reservists.

27. As commandants are held personally responsible by government for the safety and effective condition of arms and accoutrements entrusted to their respective corps, no issue of either one or other is to be made by the ordnance department to a new corps until the name of the commandant is notified in the local gazette. Requisitions for arms and accoutrements for reservists should be made according to the procedure laid down in article 239, army regulations, India, vol. IX.

28. Each member of the volunteer reserve will be supplied by Government with one rifle, one bayonet or sword-bayonet, and one set of brown accoutrements.

28A Mounted reserve volunteers will be provided with arms, accoutrements, saddlery, &c., as supplied to members of mounted active volunteer corps (*vide* paras. 231, 231A, and 232 army regulations, India, vol. IX). Mounted reserve volunteers will also be entitled to compensation for saddlery or accoutrements not supplied by government under the same conditions as those under which compensation for these articles is granted to active volunteers (*vide* para. 233, army regulations, India, vol. IX).

29. Arms and accoutrements will be supplied to reservists under the same rules as they are issued under to active volunteer corps.

30. The arms should be kept by reservists themselves where this can be done safely, otherwise suitable arrangements should be made by the corps for their safe custody.

30A. Service small arm ammunition for reserve volunteer corps will be retained in charge of the ordnance department for issue as required, except in cases where the volunteer reserves are regularly organised and the commanding officer has suitable accommodation at his disposal, when the ammunition may be placed in his charge. The issues will be limited to those cases in which the Director-General of Ordnance has satisfied himself on these points and will be regulated by him accordingly.

31. The wearing of uniform by volunteer reserve corps or companies will not be compulsory; but should the wearing of uniform be decided on, a grant of Rs. 5 will be passed for each reservist to whom uniform is supplied, on the same terms as for members of active volunteer corps. This allowance will be passed only once for each reservist.

32. A simple suit of khaki drill in the plains and of serge of the same colour in the hills would appear to be the most suitable uniform for the reserves. If preferred, reservists may adopt the uniform of the active corps to which they are attached. The colour and pattern of uniform of reservists must be approved by the local government.

33. The rules contained in section XI, army regulations, India, vol. IX, on the subject of the custody and inspection of, and the responsibility for, arms and accoutrements shall apply generally to the arms and accoutrements of volunteer reservists.

34. No member of a reserve corps shall take his arms, accoutrements, &c., away from the district within which he has been enrolled without special permission in writing from the commandant of the corps.

35. Every member shall keep his arms, ammunition, accoutrements, and uniform in good order and ready at all times for service. Members must deliver up their arms, ammunition, uniform, &c., when called in by competent authority.

36. Blank ammunition at the rate of ten rounds per reservist will be issued to members of reserve volunteer corps for instructional purposes. This allowance will be increased up to a maximum limit of forty rounds per man in the case of reserve battalions joining the local volunteer corps on their field days, provided a certificate is produced that the overplus was required for expenditure on field days.

SECTION IV.

Discipline.

37. The rules contained in section IX of army regulations, India, vol. IX, on the subject of discipline of active volunteer corps, will apply to reserve corps of volunteers.

38. The rules regarding courts-martial and courts of enquiry contained in section X of army regulations, India, vol. IX, will be also applicable to corps of reserve volunteers and reservists.

SECTION V.

Drill and Musketry.

39. A knowledge of drill, other than such knowledge as is necessary to enable a reservist to qualify under the musketry course (*vide* para. 40), shall not be required of a reserve volunteer in order that he may obtain a certificate of efficiency; but commandants should encourage reservists to acquire a knowledge of drill, and should afford them such facilities as are possible of practising drill.

40. The following is the musketry course to be executed towards qualifying as an efficient for the season and before the capitation grant of Rs. 10 can be earned (see para. 45) :—

Yards.	Rounds.	Position.	Target.	Hits.
100	5	Standing ...	4 feet square ...	3
200	5	Kneeling, sitting, or standing.	Do. ...	3
300	5	Any military ...	Do. ...	2

41. Where a reserve corps is affiliated to an active volunteer corps, the reservists, if convenient for them, will practise firing and execute their annual course of musketry at the range of the active corps, but where this is inconvenient or impracticable, reservists, whether belonging to an affiliated corps or to a corps unconnected with any active corps, will go through their firing at any suitable ground appointed by the commandant of the corps, a qualified person deputed by the commandant being responsible that the reservist fires from correct distances and at proper-sized targets made either of wood or canvas, so as to be easily moved from place to place as necessary.

42. A reservist who has qualified as an efficient for three years, according to paragraph 40, may be excused, if the commandant of his corps is satisfied that he is efficient, from the annual course and from drill for two years, and may be classed as efficient and be entitled to the capitation allowance, *i. e.*, on the responsibility of the commandant he may be excused the annual course for two years, but must go through it in the sixth year of his service, and again in the ninth year of service, and so on.

43. As reserve volunteer corps may consist of persons who, on account of their residence or place of business, are obliged to live at a distance from a volunteer centre, commandants of volunteer reserve corps should endeavour to afford every opportunity to such members of their corps to execute their musketry course, &c., by deputing the sergeant instructor or any qualified person to visit any station where a sufficient number of members can be collected, and in any other way practicable. A reservist may make himself efficient at any period between the 1st April and the 31st March.

44. When reservists use the ranges of the volunteer corps to which they are attached, they must observe the rules and regulations laid down in section XV, army regulations, India, vol. IX, for observance at ranges.

SECTION VI.

Capitation.

45. At the commencement of each financial year, Rs. 10 will be paid by government as an annual capitation for each reservist in respect of whom the commandant can certify that such reservist is acquainted with the proper method of keeping his arms, accoutrements, and ammunition in proper order; that his arms, &c., were in good order when inspected by the person appointed to do so; that he has executed the musketry course laid down in para. 40, and that he has attended, inclusive of parades for musketry, seven parades or drills during the preceding twelve

months. The capitation grant will be drawn by the commandant of the active corps to which the reserves are attached, who, after defraying any expenses properly incurred on account of the reserves, may treat the balance as part of the capitation grant of the active corps. In the case of reserve corps which are not attached to active volunteer corps, the capitation allowance will be drawn by the commandant of the reserve corps and expended for his corps in accordance with the rules prescribed in para. 460 of army regulations, India, vol. IX.

SECTION VII.

Miscellaneous.

46. Rules for the guidance of volunteer reserve corps, not inconsistent with these regulations, may be drawn up by the commandant of the corps and submitted to the local government or administration for approval, and such rules, when approved by such government or administration, will be binding on the members of the corps.

47. Commandants of reserve volunteer corps will cause to be kept up carefully a roll containing the names of all the members of the corps under their command, their places of residence or business, their age, and any other particulars considered necessary; and will also be responsible that this roll is corrected from time to time, especially when reservists change their residence (see para. 10). This roll, duly corrected, must be submitted to the local government or administration quarterly.

48. The rules for the submission of returns, correspondence, &c., in section XX of army regulations, India, vol. IX, will be generally applicable to volunteer reserve corps.

CHAPTER I, PARA. 9.

ALTER the No. and date of the Circular cited in the margin to "*No.* $\frac{5}{48}$, *dated 2nd March* 1892," and for the rules substitute the following rules and two statements :—

Weekly telegrams.

I.—The first indication of failure of harvest or scarcity in a Province should be communicated in the weekly telegraphic "weather and crop" reports.

II.—When apprehension arises that relief measures may have to be undertaken, the telegraphic reports should be supplemented by monthly written reports.

III.—When relief measures have been actually commenced, the weekly telegrams should state the aggregate number of persons, without details of age or sex, (1) on relief works, (2) on gratuitous relief on the last day of any week for which district reports have been received.

IV—Although statistics are not required under Rule III for each district, but only for the Province as a whole, it will be convenient that when distress occurs in entirely different parts of a Province, affected districts in each part should be grouped together and separate statistics telegraphed for each group.

V—The inclusion of a district for the first time in the affected area, whether of a Province or group, and similarly the exclusion of a district from the affected area, should be communicated in the weekly telegrams.

Monthly Reports.

VI—The monthly reports should ordinarily consist of two tabular statements in the Forms A and B appended.

VII.—The statements should be accompanied by a map in which affected tracts should be approximately indicated by a blue colour in two shades—light blue signifying slightly affected and dark blue seriously affected tracts.*

VIII.—In the page of remarks attached to the monthly statement A, the wages prescribed on relief works and the data on which they have been determined should be noted; any changes should be recorded and explained in subsequent reports.

IX.—The report for each month must be despatched to the Government of India, whether complete or incomplete, in the first half of the next month, either by the Government of the Province, the Board of Revenue or other revenue authority as the Local Government may determine. Deficient information may be subsequently submitted either in the next monthly report or in a separate letter.

General Reports.

X.—As soon as the information is available, a general report should be submitted, giving an account of the economic condition of the affected districts or groups of districts in ordinary times, and indicating the crops affected and the extent to which they have suffered ; the contingencies on which the pro-

* Skeleton maps of uniform size and character will be supplied, on indent, by the Imperial Survey Department for the purpose of this rule.

bable duration of distress depends; the position of the affected area as to local trade, food-supply and communications; and any other general information likely to be instructive. A fresh general report is required for all new districts or groups of districts which may become affected subsequent to the submission of the first general report.

Special Reports.

XI.—The following matters should be separately represented, as occasion may require, in special reports, which should be submitted in sufficient time to enable the Government of India to make any provision of funds or establishments which may be necessary:—

A.—If there is any reason to believe that the Provincial funds will prove insufficient to meet the exigencies of famine, the extent to which Imperial aid is likely to be required.

B.—The extent to which the suspension or remission of land-revenue may be considered necessary.

C.—The extent to which the Provincial staff requires to be increased by drafts from Imperial Departments or otherwise.

XII.—Any reports other than those required by these rules which may be prescribed by the Local Governments for their own information need not be submitted to the Government of India otherwise than for exceptional reasons.

CHAPTER I.

INSERT the following new paragraph after paragraph 8 :—

PARA. 8 A.—The following rules prescribed by the Governor-General in Council will be observed in maintaining a programme of Relief Works :—

Rules to be observed in ordinary times. *

I.—In accordance with the instructions of Resolution No. $\frac{6}{340-50}$ G., dated 8th December 1881, the Agricultural Department is responsible for collating information (1) as to the liability of each district to scarcity and famine, and (2) as to the general character of the protective measures which appear to be needed.

II.—The Commissioner of the Division, or if there be no Commissioner the Collector, is responsible for deciding, after such communication with District Officers, the Public Works Department and the Agricultural Department as may be necessary, and subject to such rules as the Local Government may prescribe—

A.—the number of persons for whom it is requisite that relief-works should be provided in the event of serious famine ;

B.—the programme of relief-works which is to be adopted.

* *Rules I to V inclusive refer only to the nine districts of Hissar, Rohtak, Delhi, Gurgaon, Karnál, Umballa (four southern tahsíls), Ferozepore, Lahore and Hazára for which programmes have been submitted to the Government of India since April* 1888 *(Punjab Government No.* 84, *dated* 21*st April* 1888, *Government of India No.* $\frac{37}{4-5}$ *F., dated* 10*th May* 1888, *and subsequent correspondence).*

III.—The estimate A and programme B will be annually revised, due regard being given (1) to the increased protection afforded during the past year by new irrigation works, improved communications or otherwise; (2) to the exhaustion of relief-works since the issue of the programme last published.

IV.—Revised statements A and B shall be submitted to the Local Government not later than the 1st of May in each year.

V.—A statement shall be submitted to the Government of India not later than the 1st of June in each year in the Form C appended to these rules.

Rules to be observed in times of famine.

VI.—When relief-works have been opened in any district, a supplementary programme shall, while such works are open, be submitted to the Local Government at the beginning of every quarter, that is to say, on the 1st August, 1st November and 1st February, showing—

(*a*) to what extent works on the published programme are exhausted;

(*b*) what new relief-works, if any, are added to the programme.

VII.—A statement in Form D annexed and revised in accordance with the supplementary programmes prescribed under Rule VI shall be submitted to the Government of India by the 1st September, 1st December and 1st March of each year.

VIII.—In deciding upon the character and number of works to be open at any one time regard shall be had to their prospective utility and to the possibility of their completion within or soon after the period of scarcity.

Special rules for Railways (applicable also to other works requiring Imperial sanction).

IX.—A Railway project should not except for grave reasons be included in a programme of relief-works in view—

(1) of the small ratio which the expenditure on unskilled labour bears to the total cost of a railway,—about one-third of the whole cost being incurred in England, and of the balance only a small percentage being spent on uhskilled labour;

(2) of the large financial liabilities which the commencement of railway works involves;

(3) of the loss which may be incurred if, after being commenced as a relief-work, the project or alignment may be subsequently abandoned or condemned.

X.—When for reasons considered sufficient it is desired to include a railway project in the programme of relief-works, a report should be submitted to the Government of India in the Revenue and Agricultural Department, showing—

(*a*) the liability of the districts through which the railway passes to famine;

(*b*) the advantages of the railway as a permanent protection of the districts affected by it against famine;

(*c*) the number of persons for whom it is requisite that relief-works should be provided in the event of serious famine;

(*d*) the number that can be provided for by works other than the railway;

(*e*) the reasons why the railway is required as a relief-work in supplement or preference to other works;

(*f*) the number of persons for whom work of suitable kind can be provided for by the railway;

(*g*) the proportion of the cost of such relief-work to the whole cost of the line.

XI.—If the railway or any part of it is accepted by the Government of India as admissible in the programme of relief-works on general grounds, the necessary reconnaissances or surveys should be undertaken and the alignment submitted to the Government of India in the Public Works Department and their approval obtained to the project before it is finally entered in the programme of relief-works.

XII.—If the alignment is approved, measures should be taken to secure the land required for the railway.

XIII.—If after the inclusion of the project in the programme it should at any time be in the opinion of the Local Government desirable that the railway should be utilized as a relief-work, a report should be submitted to the Government of India in the Revenue and Agricultural Department, setting forth the reasons why the work should be commenced.

XIV.—In the event of such sanction being accorded, the Local Government should transmit punctually and regularly to the Government of India in the Public Works Department the ordinary monthly and quarterly "Narrative Progress Reports" together with a memorandum showing the maximum, minimum and average number of labourers employed and the total cash issues during the month, and should also communicate with that Department upon all professional and engineering questions, and submit all the usual estimates, accounts, &c., as in the case of a railway in progress under ordinary circumstances.

FAMINE STATEMENT C.

[*To be submitted to the Government of India not later than the 1st of June of each year.*]

N. B.—Numbers to be shown in "thousands."

DISTRICT.	Population.	Maximum number of persons for whom relief may be required daily in the event of serious famine.	NUMBER OF PERSONS PROVIDED FOR BY RELIEF-WORKS DAILY FOR THREE MONTHS.			REMARKS.
			Large works for which professional agency is required.	Others.		A brief description without details of the general character and utility of works under each head and of the prospects of their completion either within or soon after the period of scarcity should be given in this column.
				Simple works which District Officers can carry out with ordinary staff.	Works for relief of agricultural population in neighbourhood of villages.	
1	2	3	4	5	6	7

Note (*a*).—This form is adapted from the form in use in the North-Western Provinces. But it is not necessary that the sub-division of "Others" in columns 5 and 6 should be made, and if it is preferred, only the total under the head of "Others" need be given.

Entries in columns 4, 5, 6 should be based on calculations similar to that given in the following example:—

Example (*b*).—If a large work is estimated to provide labour for 12,000 men for nine months at the ordinary rate of progress, the estimate for the purposes of column 4 will be 12,000.

If under pressure it can and is intended to be completed in six months, the estimate will be $\frac{9}{6} \times 12,000 = 18,000$.

If it can and is intended to be completed in three months, the estimate will be $\frac{9}{3} \times 12,000 = 36,000$.

(*c*).—As it is desirable that in the event of serious famine those to whom relief is given should be concentrated as far as possible on large works, care should therefore be taken that the entries in column 4 should be materially larger than those in columns 5 and 6.

FAMINE STATEMENT D *(Supplementary to C)*.

[*To be submitted to the Government of India by 1st September, 1st December, 1st March, while relief-works are open.*]

N. B.—Numbers to be shown in "thousands."

Diagrams of the buildings and grounds will be furnished to the foreign commissions on or before January 1, 1892, indicating the localities to be occupied by each nation, subject, however, to revision and readjustment.

3. Applications for space and negotiations relative thereto must be conducted with the commission of the country where the article is produced.

4. Foreign commissions are requested to notify the Director-General not later than June 1, 1892, where they desire any increase or diminution of the space offered them, and the amount.

5. Before November 1, 1892, the foreign commissions must furnish the Director-General with approximate plans showing the manner of allotting the space assigned to them, and also with lists of their exhibitors and other information necessary for the preparation of the official catalogue.

6. The consignee of the merchandise at the first port of arrival must present at the custom-house the invoice above described, with a bill of lading and an entry in duplicate made out upon the special form to be provided for this purpose by the Treasury Department, which shall show the name of the foreign shipper or owner, the name of the importing vessel, the marks and numbers of the packages, with a statement of the nature of their contents and of their foreign value as declared in the invoice. The entry must also indicate the bonded route by which the goods are to be transported to Chicago, and must be signed by the consignee. No other declaration will be required. The goods will be consigned, on the customs entry, to "Collector of Customs, Chicago," and there need be no computation of duties upon this entry, but the amount charged against the bond of the transportation company shall be double the invoice value.

7. The Collector will thereupon issue a special permit bearing the words "Chicago Exposition," authorizing the transfer of the goods from the ship to the bonded railroad for transportation to Chicago, and will record and file one of the entries in his office and send the other by mail, with the invoice, to the Collector at Chicago.

8. The permit will be taken by the agent or consignee to the inspector on board the importing vessel, who will thereupon send the goods, by a cartman duly licensed, to be delivered under the supervision of a customs officer to the transportation company.

9. The consignee will also prepare a manifest of the goods, which, after being duly certified, will be handed to the conductor of the car carrying the same, and a duplicate copy must be sent by mail to the Collector of Customs at Chicago. Upon arrival at Chicago, of any car containing such articles, the conductor or agent of the railroad company will report such arrival by the presentation of the manifest to the customs officer designated to receive it, who shall compare the same with the copy received by mail, and superintend the opening of the car, taking care to identify the packages by marks and numbers as described in the manifests. In case of the non-receipt of the manifests, the unlading of cars need not for that reason be delayed, but the invoice may be used to identify the packages.

10. Articles sent by foreign Governments to the Exposition, which are used solely for Government purposes and are not intended for sale, will be admitted to entry at the exterior port of arrival on certificates of the proper foreign commissioner without the production of invoice. But it is desired that the estimated value of each package shall be stated on the certificate or the bill of lading in order that the pecuniary responsibility of the transportation company may be fixed.

11. These regulations will also apply to goods sent to the Exposition from foreign contiguous territory. All articles destined for the Exposition arriving from Canada on through cars under consular seal, and articles which are sent direct by vessel from any foreign port to Chicago, must be consigned by the foreign shipper to the "Collector of Customs" at that port, and on entry being made, as in the case of goods arriving at the seaboard, a permit will be issued for the transfer of the goods directly to the Exposition grounds.

12. The buildings and spaces set apart for the purposes of the Exposition are constituted "constructive bonded warehouses and yards," and all foreign articles placed therein under the supervision of the custom officers, and which have been specially imported for exhibition therein, will be treated the same as merchandise in bond. No warehouse entry will be required at Chicago in order to obtain entrance for such goods, but the latter will be kept under customs supervision in accordance with the general regulations governing merchandise in bonded warehouses, except as herein otherwise provided for. The Collector at Chicago will keep, a special record, in the form of a warehouse ledger, of every invoice, assigning serial numbers to the same in order of their reception, and the transportation entry received from the Collector at the port of arrival will be considered the warehouse entry.

13. After the packages have been placed in the respective positions assigned to them by the officers of the Exposition, they will be opened by an officer of the customs, who shall primarily identify the contents with the invoice only as to quantity and character. Due examination of the contents and appraisement of values will be subsequently made by the appraiser, who shall be furnished with the invoice of the articles to be appraised, and shall indorse his report of appraisement upon such invoice in like manner as if such articles were regularly entered for consumption or warehouse. The entry will then be liquidated, the full amount of duties ascertained, and the whole transaction entered upon the prescribed record. All the proceedings relating to the examination, appraisement, and liquidation shall be the same as on ordinary importations.

14. As, under the United States tariff, the cost of packages is made a part of the dutiable value of imported goods, the empty boxes, barrels, and casks from which imported articles have been taken in order to be displayed should be carefully preserved so as to be repacked for exportation at the close of the Exposition. Dutiable packing-cases not exported will be subject to the payment of duty. It is expected that a place will be provided for the storage of such empty packages, and the latter should be recorded and numbered for identification.

15. Packages containing articles imported for gratuitous distribution, or for actual use and consumption in restaurants, refreshment rooms, etc., must be regularly entered for consumption and duty paid thereon before being delivered by the customs officers.

16. The articles after having been received in the Exposition will remain under the custody of the customs officers, and must not be removed from the place assigned without a permit from the Collector of Customs or the officer who may be designated by him to grant such permit. In no case shall such article be released from the custody of the

customs officers, unless the same shall have been regularly withdrawn for consumption, for warehouse, or for export. The requisite number of customs inspectors will be stationed at every place containing foreign exhibits, each of whom will be placed in charge of a section, which shall be numbered and designated as a customs division. A list of the articles entered for exhibit in his section will be furnished to each of such inspectors, who shall retain a copy thereof, certify the original, and transmit it to the Collector.

17. Sales may be made during the exposition of articles imported for exhibition, but deliveries of the same will be allowed only at the close of the Exposition. For this purpose a regular withdrawal as from bond will be required, and duty must be paid according to law. In case the articles are sold for delivery at some port other than Chicago, a withdrawal may be made for transportation and re-warehouse, duty to be paid at the place of destination. Any exhibitor of articles which shall be sold may authorize withdrawal of the same by the purchaser, such authority to be contained in a written notice to the Collector at Chicago. After the filing of such notice, the person specified in the same shall be recognised as entitled to all the rights and subject to all the liabilities of the original importer.

18. Withdrawal from bond cannot be made for less than one entire package, but in case of accidental damage or destruction, it is not intended to assess duties upon such articles as shall not have entered into actual consumption in this country. On articles which shall have suffered diminution or deterioration from incidental handling and necessary exposure, the duty, if paid, will be assessed according to the appraised value at the time of withdrawal for consumption.

19. At the close of the Exhibition all goods intended for exportation will be transported in bond to the seaboard or exterior port, and exported therefrom under the general regulations for immediate export in bond, as modified by special regulations to be in due time provided.

20. Any exhibitor who may import merchandise in excess of that which he desires to place on view in the Exposition may make regular warehouse entry of the same on its arrival at Chicago, whereupon it shall be taken to a United States bonded warehouse and stored without payment of duty, subject to the regulations provided for bonded goods. Withdrawals of merchandise stored under these conditions, if made for the purpose of placing the same within the Exposition, will be treated under the provisions for entry on arrival at first port of entry, and no duty will be required to be paid. Such merchandise must be delivered at the Exposition in charge of a customs officer Should any merchandise be abandoned by the owner at the close of the Exposition, it will be placed in a general order warehouse for twelve months, and, if then unclaimed, will be sold for account of owner.

21. The privileges granted by virtue of these regulations are intended solely for the benefit of exhibitors at the World's Columbian Exposition, and with the view of relieving them, so far as practicable, of delays and vexations in connection with the customs business pertaining to their importations. Any attempt to take advantage of these regulations in order to evade the tariff laws of the United States will subject the offender to all the penalties prescribed by those laws, including confiscation of goods and fine and imprisonment.

22. The regulations issued by this Department on January 7, 1891, are hereby revoked, and the foregoing adopted in lieu thereof.

DRAFT RULES.

Under the provisions of Section 18 (1) of Act XV of 1881 (The Indian Factories Act) as amended by Act XI of 1891, the Hon'ble the Lieutenant-Governor is pleased to make the following rules for the better control of factories situated within the limits of the Punjab and its Dependencies, in supersession of the rules published with *Punjab Government Gazette* Notification No. $\frac{998}{4660}$, dated 24th September 1883 :—

1. The terms "factory," "child," "mill-gearing" and "employed" when used in these rules shall have the meaning given to them in the Act. "Inspector" means the District Magistrate. "Joint Inspector" means an Inspector appointed by the Lieutenant-Governor under Section 3 of the Act.

2. Every Joint Inspector shall be subordinate to the District Magistrate for the carrying out of the Factories Act and rules under it.

3. Each Inspector shall keep a register of all factories within his jurisdiction in the Form A attached to these rules.

4. On the publication of these rules, the Inspector shall send, through the post under registered cover, a notice to the occupier of every factory within his jurisdiction intimating his intention of placing such factory upon his register of factories.

5. Any person served with a notice under Rule 4 who considers that his premises do not fall within the definition of a factory given in the Act may, within 15 days of the receipt of such notice, forward to the Inspector a statement setting forth his objections to the registration of his premises as a factory. The Inspector shall consider and dispose of such objections after making such enquiry as he may deem necessary, and shall make up his register of factories in accordance with the provisions of the Act.

6. The Inspector may at any time serve a notice, as provided in Rule 4, upon the occupier of any factory which is not already entered in his register of factories; and the provisions of Rule 5 shall apply to the subsequent proceedings in all such cases.

7. When any premises cease to be occupied as a factory, the occupier may give notice of the fact to the Inspector, who shall, if satisfied that the Act is no longer applicable to such premises, remove them from his register of factories.

8. Every factory shall be inspected by the Inspector or Joint Inspector as often as the former may deem sufficient, but not less than twice in each calendar year, and at each inspection the inspecting officer shall examine all registers required to be kept under the Act, and see that all orders respecting the secure fencing of machinery are being duly carried out.

9. The Inspector shall keep a register of his inspections of each factory in the Form B appended, in which he shall record all orders and remarks made by him on each occasion of his inspection. When a factory is inspected by a Joint Inspector his orders and remarks shall be recorded in the Inspector's register.

10. A copy of every entry made under Rule 5, and of every order passed by an Inspector or Joint Inspector under Section 4 (*c*) or Section 12 (*c*) of the Act, shall be furnished without delay to the occupier of the factory concerned.

11. The occupier of a factory shall, if required by the Inspector or Joint Inspector, bring before him, on the occasion of any inspection all children and any other persons employed in the factory whom the Inspector or Joint Inspector may wish to see.

12. Every order for the fencing of any part of the machinery or mill-gearing of a factory which an Inspector or Joint Inspector may pass under Section 12 (*c*) of the Act shall state clearly what is required, so that the said machinery or gearing may be securely fenced, any shall specify a reasonable time within which what is required to be done shall be completed, and shall further give notice that if it shall not be so completed, the person responsible for the breach of order will be prosecuted under Section 15 of the Act.

13. Appeals against orders passed under Section 12, clause (*c*), of the Act shall be presented and heard as follows. Such appeals shall be in writing and shall be accompanied by a copy of the order appealed against and shall be presented within 15 days of the date of the order at the office of the Inspector by whom the order appealed against was passed. The Inspector shall forward within 7 days of its presentation each such appeal to the authority appointed under Section 12 by the Local Government in this behalf, with any remarks or explanations which he may see fit to make. The authority appointed as aforesaid shall, on receipt of the appeal, fix a time and place for hearing it, and shall give due notice of such time and place to the appellant. The appeal shall be heard at the time and place intimated, or at another time and place of which due notice has been given to the appellant.

In computing the period prescribed by this rule the day on which the order complained of was passed, and the time requisite for obtaining a copy of such order, shall be excluded.

13 A. A copy of every order passed under Section 12 (*c*) or an appeal from such an order shall forthwith be transmitted to the Local Government by the authority who passed it.

14. Notice shall be given of every accident occurring in a factory, which causes death, on the same day on which the accident occurs. Notice of accidents of a less severe character, but causing bodily injury which prevents the person injured from returning to his work within 48 hours of their occurrence, shall be given immediately on the expiry of the 48 hours during which the person injured is unable to return to his work. Such notices shall be in writing and shall contain full information as to the nature and cause of the accident, and shall be sent by the occupier of the factory, or, in his absence, by his principal agent in the management of such factory, to the Inspector within whose jurisdiction such factory is situated.

15. Of the whole supply, at least as many gallons as there are persons employed in the factory shall be fit for drinking purposes and the remainder shall be fit for purposes of washing.

16. The minimum space provided for each person employed in any room of a factory shall be 36 superficial feet, 500 cubic feet and 10 square feet of lateral ventilating opening. Provided that in cases in which lateral ventilation cannot be contrived on account of the nature of the industry carried on in such room, sufficient interchange of fresh air shall be ensured by forced ventilation or other means as the Inspector may deem sufficient, or, if this cannot be managed, a minimum of 54 superficial feet and 900 cubic feet shall be provided for each person employed.

Provided also that, subject to the control of the Commissioner, the Inspector, or with the consent of the Inspector, a Joint Inspector, may, for reasons to be recorded in writing, relax the conditions of this rule where, in his opinion, this may be done with due regard to the health of the factory hands employed in any particular room or rooms of a factory.

17. For every factory adequate latrine and urinal accommodation shall be provided in a part of the grounds detached from any other factory building. In no case shall there be less than one latrine seat for every fifty persons employed.

3. Regarding Question (1), the Conference decided in favour of adding the proposed foot-note, with an addition giving power to the Department to refuse to recognise a school for any one of three reasons.

The Lieutenant-Governor approves of the foot-note, and of the requirement that a school should have existed for at least six months before it is recognised ; but the further grounds of non-recognition, as applicable to Unaided Schools, His Honor does not consider either necessary or expedient. The following will, accordingly, be added as a note to Article 19 :—

A list of Public Schools is kept by the Department, and no schools are recognised as such until enrolled on that list.

It shall be in the power of the Department to refuse to recognise any school unless it is certified by the Inspector of Schools as having been in existence six months before the Middle School or the Entrance Examination, as the case may be.

4. The decision of the Conference, that the University be moved to make the disciplinary rule lately passed by the University, in reference to the Middle School Examination, applicable to the Entrance Examination, is approved by the Lieutenant-Governor ; and the University will be addressed on the subject.

5. Question (2) regarding the study of English was referred to a Sub-Committee, on the report of which the Conference adopted the following resolutions :—

(1). That a concise Manual, containing hints on the teaching of English in the Punjab, be issued by the Department ;

(2). That the time given to different subjects in the Upper Primary Department be redistributed as recommended by the Sub-Committee ;

(3). That the beginnings of English conversation be required in the Upper Primary Department ; and that in examination by the Upper Primary Standard, Grammar and Spelling be tested in writing, and not exclusively orally as at present, the Inspector using the oral test when he should think it necessary, and only to supplement the written test ;

(4). That the time for the study of English in the Middle Department be redistributed as follows:—

First and Second Classes.

	Hours.
Reading and Repetition of simple pieces ...	6
Grammar (chiefly orally, but with the study of a simple text-book) ...	3

and that it be left to the Department to issue such instructions regarding *pronunciation*, *accent*, and *expression*, and the other qualities of good reading, as may seem necessary;

and that, on the understanding that, in the Reading lesson, all explanation will ordinarily be in English, one hour be taken from Physical Science and given to *Translation into Urdu*, in both classes;

(6). That the attention of the Department be drawn to the fact that the regulation in the Scheme of Studies for High Schools, which requires translation from Persian into English and *vice versâ*, is a dead letter;

(7). That in High Schools the medium of instruction should be English;

(8). That in Middle Schools the medium of instruction in Geography and Arithmetic should be English, and that in the Middle School Examination the candidates should answer the papers in Arithmetic and Mensuration in English, but that, for the present, it should be optional to answer the paper in Geography either in English or in Vernacular; a candidate choosing the Vernacular should, however, be at liberty to use English names and technical terms;

(9). That the Text-Book Committee be asked to draw up a series of graduated English Readers on the most approved European methods for Upper Primary Schools;

(10). That a text-book in English be prescribed for the Middle School Examination, and that the fixed course of reading be that recommended by the Text-Book Committee;

(11). That for the First and Second Middle Classes of Board Schools the revised text-books of the Punjab Series for those classes be fixed, and that no option as to alternative Readers be given;

(12). That the following division into three parts of the papers in English in the Middle School Examination, as recommended by the Sub-Committee, be accepted:—

One paper of two hours in the text-book prescribed for the 3rd Middle Class;

The distribution of marks proposed by the Sub-Committee is noted below:—

Total	...	175

Instead of—

Translation from English into Vernacular	...	50 Marks.
Translation from Vernacular into English	...	60 ,,
Grammar	...	40 ,,
Caligraphy	...	25 ,,
Total	...	175

(14). That the recommendation regarding the text-book in English for the Middle School Examination be applied to the English Course for the Entrance Examination;

(15). That the Conference bring to the notice of the Department the propriety of revising the English Courses prescribed for the Anglo-Vernacular Certificates, so as to include, in addition to the present requirement, suitable texts for critical study as recommended in paragraph 23 of Mr. Bell's memorandum;

(16). That, in the interests of English education in the Province, arrangements should be made to send to England every year a few promising young teachers, or members of the Educational Department, to undergo a course of training in an English Training College, where residence is compulsory;

(17). That, as recommended by the Sub-Committee, the encouragement of Reading-Rooms in Schools, if necessary by special grants, be accepted.

The Lieutenant-Governor approves of the decisions of the Conference as regards (1), (3), (7), (8), (9) and (15), the first and last two of which will be referred to the Director of Public Instruction for compliance in consultation with the Text-Book Committee. The new regulations contained in (3), (7) and (8) will be embodied in the Code by altering Article 501 as follows:—"In Anglo-Vernacular High Schools, English is the medium of instruction, except in the case of the Classical Languages and Persian, where this may not, at present, be possible. In Anglo-Vernacular Middle Schools or Departments, the Vernacular is the medium of instruction, except in Geography and Arithmetic (including Mensuration), which should, as far as practicable, be taught through the medium of English. In both the High and Middle Departments of Anglo-Vernacular Schools, the scholars should be required to speak English at all times, except in the classes where the Vernacular is, for the present, allowed. In the Upper Primary Department, the beginnings of conversation in English should be steadily and gradually encouraged." The requirement in (3), that Grammar and Spelling by the Upper Primary Standard be tested chiefly in writing, will be met by a *note* to Article 197.

With regard to (2), the Lieutenant-Governor approves of giving a little more time to English, but not of the entire elimination of Persian from the Upper Primary Department; nor of the reduction of the time given to Arithmetic. The time given to Persian, His Honor considers, might, at this stage, be reduced to three hours, whereby two extra hours a week would be available for each of the English Classes.

Regarding (4) and (5), the Lieutenant-Governor agrees to the redistribution of the time proposed for the study of English in the Middle and High Departments; but His Honor would hesitate to reduce the time given to Physical Science, and so would change *Translation into English* in the tables to simply *Translation*. The recommendation regarding *pronunciation*, &c., will be met by directing the attention of the Text-Book Committee, and of the Inspectors and Managers of Schools, to the subject.

As regards (6), it is observed that, at present, the Teachers of the Classical Languages and Persian are, almost without exception, Maulavís and Pandits of the old school, who do not know English, and that it is for that reason that the regulation referred to by the Conference is in abeyance. His Honor the Lieutenant-Governor, however, has been pleased to direct the observance of the following instruction by the Education Department:—"*That the Teachers of Classical Languages and Persian, above the Middle School Standard, should, where possible, and as this becomes possible, be men acquainted with English, as well as efficient classics.*"

Regarding (10), (12), (13), and (14), so far as these concern the fixing of prescribed books for the Middle and Entrance Examinations, the Lieutenant-Governor is unable to agree, as the measure proposed tends to foster the parroting system, which has to be specially guarded against in India. His

Honor, however, approves of the apportionment of marks between *Translation into English* and *Translation into the Vernacular* proposed in the first part of (13).

The recommendation in (11) is one which concerns the Text-Book Committee, and will be referred to that body; the proposal in (16), even if advisable in itself, could not, the Lieutenant-Governor considers, be entertained in the present state of the Provincial finances; and, with regard to (17), the Head Masters of Schools will be required to use all means to encourage the use of School Libraries by the scholars, and Municipal Committees will be invited to provide yearly an addition to their Libraries of healthy school-boy literature. Where a special Reading-Room cannot be provided, one of the class-rooms, after school hours, should be invariably set apart for the purpose.

6. The proposals of the Conference regarding Question (3), that the existing grades of fees for Anglo-Vernacular Schools be retained, and that the rates of income determining the grades be fixed as recommended, are approved by the Lieutenant-Governor; and Article 224 will be made to read as follows:—

"The grade of fee of each scholar in Anglo-Vernacular Government, Board, and Aided Schools shall be determined by the income of his parent or guardian, thus—

III Grade, up to Rs. 100;

II Grade, above Rs. 100 and up to Rs. 200;

I Grade, above Rs. 200."

7. Regarding Question (4), the Conference passed the following resolutions:—

(1). That the fees levied in Lower Primary Branch Schools be the fees prescribed for the Lower Primary Departments of Anglo-Vernacular Schools;

(2). That Article 228 be modified so as to raise the limit of half rate fees in the Middle Department to 10 per cent. of the total number on the rolls in that Department.

These recommendations are approved; and Articles 221 and 228 will be amended accordingly.

8. The Conference had no proposals to make on Questions (5) and (8), regarding simplifying the Primary Standards of examination, and adapting the Zamíndári School standards to those of the ordinary schools.

9. The decisions of the Conference regarding Questions (6) and (7) are not approved on the ground, as already stated, that examining in a prescribed book tends to foster the parrot system of learning. Articles 196 and 197 will, consequently, remain as heretofore.

10. Regarding Question (9), the Conference did not recommend the giving of Attendance Grants to Maháj ani Departments of Schools. The Lieutenant-Governor, however, considers that, where the Scheme of Studies laid down for Maháj ani Schools is followed, Attendance Grants, at the rate sanctioned for the Infant Department in Appendix I of the Code, are well due to those Departments; and a note to that effect will be added to Article 74.

11. On Questions (10) and (11), the Conference proposed—

(1). That, in Article 83, Middle Department, under (*b*) Anglo-Vernacular Schools, opposite 'for not fewer than 30 scholars,' and below 'a second English Teacher,' the words 'a second Vernacular Teacher' be added;

(2). That, under the same Middle Department, and in the last clause thereof, the figure 100 be changed to 80;

(3) That clause (*b*) of Article 131 read as follows :—

"To more than one additional teacher for every 30 scholars in average attendance after the first 15 ;"

(4) That the maximum grant to an ordinary Elementary Indigenous School shall not exceed three-fourths of the ordinary expenditure on a Vernacular Primary School in the same District, and with the same attendance.

These propositions are approved by His Honor the Lieutenant-Governor.

12. Regarding Question (12), the Conference resolved—

That, for the present, grants be given to Primary Vernacular Venture Schools at the rates for Public Schools, but under the conditions for Indigenous Schools, provided that no grant be given to a Venture School which does not conform to the inter-school rules, and provided also that it is not started in a place where, in the opinion of the Inspector, there is no need for it.

The Lieutenant-Governor accepts this proposal, but would limit the rates to three-fourths of those for Public Schools.

13. The Conference voted on Question (13) that the present regulation of the University regarding the choice by the candidates of a compulsory Classical Language in the Entrance Examination be retained; and this decision is approved, on the ground that, if passing by a second Classical Language, which was named as optional, were to be reckoned as passing in the compulsory Classical Language, the taking up of two Classical Languages would be unduly encouraged, and the other optional subjects, including Physical Science, would suffer.

14. With reference to Question (14), the Conference recorded the following resolutions :—

(1). That, in view of the fact that a Classical Language or Persian is compulsory in the Entrance Examination of the Punjab University, and that the Punjab University makes the study of any of these languages optional in the Middle School Examination, and as this contrariety of procedure is found to be prejudicial to the study of these languages in schools, a Classical Language or Persian be made compulsory, in the Middle Department, forming a fifth compulsory subject ;

(2). That with a view to improve the study of English and the Vernacular, it is desirable that Persian be cut out of the Scheme of Studies for Primary Schools ;

The Lieutenant-Governor is unable to approve of the first proposal, as it is inconsistent with the regulation recently adopted by the University regarding a Science Entrance Course, which does not require a Classical Language or Persian. With regard to the second proposal, His Honor is not disposed to go so far as to eliminate Persian entirely from the studies of Primary Schools; but he agrees to reduce the time given to Persian in Anglo-Vernacular Primary Departments from 5 to 3 hours, and, as Persian is optional in all the public examinations, to make it also optional in the Schemes of Study for Primary, Middle, and High Departments. This, it is understood, will not only set free more time for the study of English in the Primary classes, but will dispose of the complaint that Persian, as compared with Arabic and Sanskrit, is unduly encouraged. In all respects these languages will now be placed on an identical footing.

15. The resolutions of the Conference on Questions (15), 16), (17) and (19) were the following :—

(1), That, in two places in Article 232, the words 'Hindu and Sikh boys' be changed into 'Hindu, Sikh, or other boys ;'

(2). That, in modification of the rates and the number of scholarships tenable in Girls' Schools, under Articles 360 and 361, *Upper Primary Scholarships* be of the fixed value of Rs. 2 per mensem, up to a limit of 25 per cent. of the number on the rolls in the Lower Primary Department, and *Middle School Scholarships* of Rs. 3 and 4 per mensem, up to a limit of 20 per cent. of the number on the rolls in the Upper Primary Department;

(3). That the Schemes of Study for the Middle Departments of Girls' Schools, as prepared by the Department and modified by the Sub-Committee, be adopted;

(4). That *Agriculture* be recognised as an opitional subject in the Middle School Examination.

The above decisions from (1) to (3) are approved; and the necessary alterations will be made in the Code. The 4th decision will be referred to the Punjab University for consideration.

16. Regarding Question (18), the Conference considered a letter on the subject of encouraging the study of Sanskrit, from the Secretary of the Sanátana Dharma Sabha, Lahore, and, after a lengthened discussion, recorded the following resolution:—

That no remedial measures are necessary, and that as the higher number of marks allotted to Sanskrit and Arabic in the examination are a sufficient encouragement to the study of those languages, and as Science is a more interesting and popular subject than either of the two languages, the choice should be left entirely to the boys.

The Lieutenant-Governor accepts this decision, and believes that the placing of all the Classical Languages on the same footing will go far to meet the object desired by those interested in a special language. In the High School course, Arabic and Sanskrit will now be optional with Persian among the compulsory subjects; and to ensure that these languages receive adequate attention in the schools, Inspecting Officers will be required to convince themselves, where they are taught, that the instruction given in them is efficient.

17. Questions (20) to (24) were referred to a Sub-Committee; and the following were the ultimate decisions of the Conference thereon:—

(1). That the following addition be made to Article 153 of the Code:—

"If in the opinion of the Inspecting Officer the work shown by any teacher at the time of the Annual Inspection is so exceptionally good that he appears clearly fitted to hold the next higher appointment (according to the classification in this Article), the Inspecting Officer may endorse the certificate accordingly; and the teacher shall then, for the purposes of a Staff Grant, be considered to hold the certificate necessary for the said higher appointment;

"It is to be understood that this endorsement remains valid for a period of twelve months unless cancelled by the Inspecting Officer himself within that period. The endorsement may be renewed from year to year at the pleasure of the Inspecting Officer;"

(2). That the following addition be made to Article 155:—

"It must be distinctly understood that the minimum period of approved service (as specified in the next Article) does not of itself render it necessary that the certificate should be raised;"

(3). That in Article 156 under "Senior Certificates," "ii—For a Provisonal First Grade Certificate"—"Two years'" be changed into "Four years'," and "(as in I)" be expanded into "as Head Master in a Middle School, or Assistant Teacher in a High Department;"

(4). That the rule regarding the issue of Teachers' Certificates, as laid down in Article 193, be retained;

(5). That a note be added to Article 178 to the following effect:—

"Inspectors under this Article have the power of suspending a certificate of any kind;"

(6). That clause (*c*) of Article 370 be cut out, and that Rs. 20 be substituted for Rs. 25 in clause (*d*), which will now become clause (*c*) of the Article;

(7). That for the purposes of Article 80 a graduate may be considered as holding a Provisional Second Grade Certificate for two years. If during, or at the end of, that period he does not pass the Senior Anglo-Vernacular Examination, this concession will be withdrawn; but, if successful, his previous service will be taken into account for the purposes of Article 156;

(8). That the principle of recognising provisionally graduates as eligible for teacherships in Aided Schools be applied also to Board Schools.

(9). That the knowledge of the Code required of candidates for Teachers' Certificates, in Article 208, be limited to an acquaintance with the School Registers, and the method of keeping them;

These proposals are approved by the Lieutenant-Governor, who would, however, substitute the following for the second clause of the first resolution:—

"This endorsement shall remain valid from year to year, unless cancelled by the Inspecting Officer."

18. With reference to Question (25), the Conference agreed, on the recommendation of a Sub-Committee,—

That the Log-Book should consist of two parts—

Part I.—Statistics;

Part II.—Remarks;

that out of a hundred pages, the first twelve should constitute Part I and each page in this part should contain one printed Statistical Form, as approved; that Part II should consist of blank pages, with the exception of the paging, which should run right through, and a printed heading to each page thus:—"For Statistics see page—;" and that, at the beginning of the book, there should be a printed form, also as approved, of directions to Inspecting Officers.

The above decision is approved.

19. His Honor the Lieutenant-Governor is indebted to the members of the Conference for the time and earnest attention given to the subjects submitted for their consideration; and he desires to convey to them the thanks of the Government for the very helpful results of their deliberations.

ORDER.—Ordered, that the Resolution be published in the Gazette in English and the Vernacular, and that copies be supplied to the members of the Conference, to Commissioners and Deputy Commissioners, to the Principals of Government, Board, and Aided Colleges, and to the Managers of Aided Secondary Schools for Natives.

By order of the Hon'ble the Lieutenant-Governor,

J. SIME,

Under-Secretary to Government, Punjab,

Home (Education) Department.

The 18th August 1892.

No. 486.—*Notification.*—The following Circular of the Government of India, Revenue and Agricultural Department, and enclosures, regarding exhibition of the work of the women in India at the World's Columbian Exhibition at Chicago are published for general information:—

Circular No. 31—38, dated Simla, 18th July 1892.

From—Sir E. C. BUCK, KT., C. S. I., Secretary to the Government of India, Revenue and Agri. Department,

THE Government of India have received through Her Majesty's Secretary of State an invitation from the President of the Board of Lady Managers of the Chicago Exhibition to co-operate with the Board in its efforts to secure a representative exhibit of the artistic,

industrial, educational and philanthropic work of the women of India at the World's Columbian Exposition. The purposes of the Lady Managers are set forth in the accompanying papers,* which, I am to suggest, should, with the permission of His Honor the Lieutenant-Governor, be published and circulated for general information whereby any lady in the Punjab who may wish to contribute exhibits will be afforded an opportunity of so doing.

* Enclosures of letter dated 23rd March 1892 from the President, Board of Lady Managers, World's Columbian Exposition, Chicago.

2. All such exhibits should be sent to the India Office to the address of Her Majesty's Under-Secretary of State and marked "Exhibit for Women's Building, Chicago."

THE PURPOSES OF THE BOARD OF LADY MANAGERS OF THE WORLD'S COLUMBIAN COMMISSION.

THE Board of Lady Managers of the World's Columbian Commission, having been created and authorized by the concurrent action of Congress and the Columbian Commission to take entire charge of the interests of women at the coming Exposition, desires to develop to the fullest extent the grand possibilities which have been placed within its reach.

The Board wishes to mark the first participation of women in an important national enterprise by preparing an object lesson to show the progress made by women in every country of the world during the century in which educational and other privileges have been granted her and to show the increased usefulness that has resulted from the enlargement of her opportunities.

The Board of Lady Managers invites the women of all countries to participate in this great exhibit of women's work, to the end that it may be made not only national, but universal, and that all may profit by the free comparison of methods, agencies, and results.

It is of the first importance that such a representative collection be secured from every country as will give an adequate idea of the extent and value of what is being done by women in the arts, sciences and industries.

We will aim to show to the breadwinners, who are fighting unaided the battle of life, the new avenues of employment that are constantly being opened to women, and in which of these their work will be of the most distinct value by reason of their natural adaptability, sensitive and artistic temperaments, and individual tastes ; what education will best enable them to enjoy the wider opportunities awaiting them and make their work of the greatest worth, not only to themselves, but to the world.

The Board has decided that at the coming Exposition it will not attempt to separate the exhibit of women's work from that of men, for the reason that, as women are working side by side with men in all the factories of the world, it would be practically impossible, in most cases, to divide the finished result of their combined work ; nor would women be satisfied with prizes, unless they were awarded without distinction as to sex and as the result of fair competition with the best work shown. They are striving for excellence, and desire recognition only for demonstrated merit. In order, however, that the enormous amount of work being done by women may be appreciated, a tabulated statement will be procured and shown with every exhibit, stating the proportion of woman's work that enters into it. The application blanks now being sent out to manufacturers contain this enquiry.

The Board of Lady Managers has been granted by act of Congress the great and unusual privilege of appointing members of each jury to award prizes for articles into which woman's work enters. The number of women on each jury will be proportionate to the amount of work done by women in the corresponding department of classification. The statement as to the amount of their work will, therefore, be of double significance, for, in addition to the impressive showing of how large a proportion of the heavy labour of the world is being performed by the weaker sex, it will also determine the amount of jury representation to which the Board is entitled.

Beside the extensive exhibit in the general Exposition buildings, women will have another opportunity of displaying work of superior excellence in a very advantageous way in the Woman's Building, over which the Board of Lady Managers will exercise complete control. In its central gallery it is intended to have grouped the most brilliant achievements

of women from every country and in every line of work. Exhibits will be admitted only by invitation, which will be considered the equivalent of a prize. No sentimental sympathy for women will cause the admission of second-rate objects, for the highest standard of excellence is to be there strictly maintained. Commissions of women organized in all countries, as auxiliaries to the Board of Lady Managers, will be asked to recommend objects of supreme excellence produced by women, and producers of such successful work will be invited to place specimens in the gallery of the Woman's Building.

Not only has woman become an immense, although generally unrecognized, factor in the industrial world, but hers being essentially the arts of peace and progress, her best work is shown in the numberless charitable, reformatory, educational, and other beneficent institutions which she has had the courage and the ideality to establish for the alleviation of suffering, for the correction of many forms of social injustice and neglect, and for the reformation of long-established wrongs. These institutions exert a strong and steady influence for good, an influence which tends to decrease vice, to make useful citizens of the helpless or depraved, to elevate the standard of morality, and to increase the sum of human happiness ; thus most effectively supplementing the best efforts and furthering the highest aims of all Government.

All organizations of women must be impressed with the necessity of making an effective showing of the noble work which each is carrying on. We especially desire to have represented, in the rooms reserved for that purpose, in the Woman's Building the educational work originated or carried on by women from the kindergarten organization up to the highest branches of education, including all schools of applied science and art, such as training schools for nurses, manual training, industrial art, and cooking schools, domestic economy, sanitation, etc. When not practically exhibited, the work of all such organizations should be shown by maps, charts, photographs, relief models, etc., but it is earnestly hoped that one at least—the most representative institution in each of these branches—will be shown from every country, in order that a comparison may be made of methods and results.

THE WOMAN'S BUILDING.

The Woman's Building is situated near one of the principal entrances to the Exposition grounds and on one side of the grand quadrangle around which the main buildings are placed. It will command from its balconies and roof garden a superb view of the Exposition grounds, buildings, and the lake beyond. The building is 400 feet long and 200 feet wide, and is being constructed for the Board of Lady Managers by the directors at a cost of $200,000.

It is intended that this building and all its contents shall be the inspiration of woman's genius, and that in it shall be provided all conveniences and comforts for women during the time of the Exposition. The design was selected from a number of competitive sketches submitted by women architects. It has both land and water entrances, and from the vestibule at each of these entrances one enters the main gallery, which occupies the centre of the building, opening to the great skylight in the roof, and surrounded by a colonnade on the second floor. This gallery will be devoted to showing the most distinguished work that has been created by women.

Distinct impetus has already been given to woman's work in various directions by the helpful policy pursued by the Board. Their work as architects has already been much commented on, and will have superb illustration at the time of the fair. A woman was employed to model the caryatides supporting the roof garden, and competition has been invited among women for the statuary above the roof line and the relief compositions in the main pediments of the building. Several large surfaces adapted to mural painting will be entrusted to such women as have had sufficient experience to warrant their being entrusted with so important a task. It is also hoped that they will furnish most of the interior structural decoration.

There will be an opportunity given to those desiring it to incorporate intended exhibits in the construction of the building in a manner both practical and artistic, such, for instance, as carved wainscoting and balustrades for the staircases, open carved screens, ornamental iron and brass work, hardware, decorative tapestries and panels, etc.

Any art association or individual woman who wishes to place such decorations in the Woman's Building is requested to notify the Secretary of the Board of Lady Managers as soon as possible, in order that arrangements may be made, the details of dimensions sent to them in ample time, and space reserved for the insertion of their work.

The Woman's Building will contain ample social head-quarters, parlors, balconies and roof gardens; reading, writing, and committee rooms; a great congress hall, in which organizations and clubs of women may meet for the interchange of ideas and hear addresses by distinguished visitors; head-quarters for the press women, etc. These, with many other features of interest, are offered freely to all women.

One room will be reserved for a library of books by women and another for the records and statistics of those employments in which women are engaged, which cannot well be exhibited. There will also be a model hospital, with women physicians and trained nurses in attendance, and adjoining it will be a department of public comfort, for the care of women and children overcome by fatigue or sudden illness. The systems of the various training schools for nurses will be shown in the model hospital, which will be conducted by these training schools, each in turn. Lectures will also be given and demonstration of the various details of the care of a sick room, etc.

The kindergarten room will also be assigned to the various associations which may desire to show their work, the time being divided equally among them.

There will be a model kitchen, with perfect sanitary appliances and ventilation, all modern conveniences, and labour-saving devices. In this kitchen demonstration lessons in cooking will be given by various associations. The bills of fare will be put in the hands of scientists, and their cost, nutriment, etc., thoroughly discussed.

For the benefit of artisans and designers there will be a loan collection of old lace, embroideries, fans, jewels, silver, etc.

Commissions co-operating with the Board of Lady Managers will be asked to aid them—

(1). To procure a representative exhibit, which shall be entered for competition in the main building, showing the work of women in all the varied occupations in which they engage.

(2). To procure as far as possible statistics as to the amount of women's work that enters into every exibit and other interesting data connected with the same.

(3). To recommend to the Board work by women of such supreme excellence as to be worthy of admission to the gallery of the Woman's Building.

(4). To recommend to the Board women who have the requisite expert knowledge to serve on various juries of award.

(5). To see that the educational work being carried on by women, from the primary to the highest branches of education, is exhibited when possible, and, when not possible, that it be illustrated by means of maps, charts, photographs, etc.

(6). To see that the charitable and philanthropic work, as well as that to promote recreation, healthfulness, reform, etc., inaugurated by women, is either exibited or made matter of record as above.

(7). To aid in giving suitable publicity to the plans of the Board of Lady Managers in all the leading papers, through the agency of press women, when possible.

(8). To aid in collection of a loan exhibit of old lace, embroideries, fans, etc.

(9). To secure the books written by women for the women's library, especially such as relate to the exact sciences, philosophy, art, etc.

RULES.

2. Every Joint Inspector shall be subordinate to the District Magistrate for the carrying out of the Factories Act and Rules under it.

3. Each Inspector shall keep a register of all factories within his jurisdiction in the Form A attached to these Rules.

4. On the publication of these Rules, the Inspector shall send, through the pos under registered cover, a notice to the occupier of every factory within his jurisdiction intimating his intention of placing such factory upon his register of factories.

5. Any person served with a notice under Rule 4 who considers that his premises do not fall within the definition of a factory given in the Act may, within 15 days of the receipt of such notice, forward to the Inspector a statement setting forth his objections to the registration of his premises as a factory. The Inspector shall consider and dispose of such objections after making such enquiry as he may deem necessary, and shall make up his register of factories in accordance with the provisions of the Act.

6. The Inspector may at any time serve a notice, as provided in Rule 4, upon the occupier of any factory which is not already entered in his register of factories; and the provisions of Rule 5 shall apply to the subsequent proceedings in all such cases.

7. When any premises cease to be occupied as a factory, the occupier may give notice of the fact to the Inspector, who shall, if satisfied that the Act is no longer applicable to such premises, remove them from his register of factories.

8. Every factory shall be inspected by the Inspector or Joint Inspector as often as the former may deem sufficient, but not less than twice in each calendar year, and at each inspection the inspecting officer shall examine all registers required to be kept under the Act, and see that all orders respecting the secure fencing of machinery are being duly carried out.

9. The Inspector shall keep a register of his inspections of each factory in the Form B appended, in which he shall record all orders and remarks made by him on each occasion of his inspection. When a factory is inspected by a Joint Inspector his orders and remarks shall be recorded in the Inspector's register.

10. A copy of every entry made under Rule 5, and of every order passed by an Inspector or Joint Inspector under Section 4 (*c*) or Section 12 (*c*) of the Act, shall be furnished without delay to the occupier of the factory concerned.

11. The occupier of a factory shall, if required by the Inspector or Joint Inspector, bring before him on the occasion of any inspection all children and any other persons employed in the factory whom the Inspector or Joint Inspector may wish to see.

12. Every order for the fencing of any part of the machinery or mill-gearing of a factory which an Inspector or Joint Inspector may pass under Section 12 (*c*) of the Act

shall state clearly what is required, so that the said machinery or gearing may be securely fenced, and shall specify a reasonable time within which what is required to be done shall be completed, and shall further give notice that if it shall not be so completed the persons responsible for the breach of order will be prosecuted under Section 15 of the Act.

13. Appeals against orders passed under Section 12, clause (*c*), of the Act shall be presented and heard as follows. Such appeals shall be in writing and shall be accompanied by a copy of the order appealed against and shall be presented within 15 days of the date of the order at the office of the Inspector by whom the order appealed against was passed. The Inspector shall forward within 7 days of its presentation each such appeal to the authority appointed under Section 12 by the Local Government in this behalf, with any remarks or explanations which he may see fit to make. The authority appointed as aforesaid shall, on receipt of the appeal, fix a time and place for hearing it, and shall give due notice of such time and place to the appellant. The appeal shall be heard at the time and place intimated, or at another time and place of which due notice has been given to the appellant.

In computing the period prescribed by this rule the day on which the order complained of was passed, and the time requisite for obtaining a copy of such order, shall be excluded.

13A. A copy of every order passed under Section 12 (*c*) or an appeal from such an order shall forthwith be transmitted to the Local Government by the authority who passed it.

14. Notice shall be given of every accident occurring in a factory, which causes death, on the same day on which the accident occurs. Notice of accidents of a less severe character, but causing bodily injury which prevents the person injured from returning to his work within 48 hours of their occurrence, shall be given immediately on the expiry of the 48 hours during which the person injured is unable to return to his work. Such notices shall be in writing and shall contain full information as to the nature and cause of the accident, and shall be sent by the occupier of the factory, or, in his absence, by his principal agent in the management of such factory, to the Inspector within whose jurisdiction such factory is situated.

15. Every occupier of a factory shall, on every day on which work is carried on in the factory he occupies, have available at the said factory for the use of the persons employed therein, free of cost to them, a water-supply consisting of at least twice as many gallons of water as there are persons employed in the factory. Of the whole supply, at least as many gallons as there are persons employed in the factory shall be fit for drinking purposes and the remainder shall be fit for purposes of washing.

16. The minimum space provided for each person employed in any room of a factory shall be 36 superficial feet, 500 cubic feet and 10 square feet of lateral ventilating opening. Provided that in cases in which lateral ventilation cannot be contrived on account of the nature of the industry carried on in such room, sufficient interchange of fresh air shall be ensured by forced ventilation or other means as the Inspector may deem sufficient, or, if this cannot be managed, a minimum of 54 superficial feet and 900 cubic feet shall be provided for each person employed.

Provided also that, subject to the control of the Commissioner, the Inspector, or with the consent of the Inspector, a Joint Inspector may, for reasons to be recorded in writing, relax the conditions of this rule where in his opinion this may be done with due regard to the health of the factory hands employed in any particular room or rooms of a factory.

17. For every factory adequate latrine and urinal accommodation shall be provided in a part of the grounds detached from any other factory building. In no case shall there be less than one latrine seat for every fifty persons employed.

---

* With a view to prevent parents and guardians from incurring the inconvenience and expense of preparing candidates who may be physically unfit for the Forest Service, it is suggested that, before any such preparation is begun, candidates be submitted to examination by the medical adviser of the family, or any other qualified medical practitioner, with regard to the following points:—

(1) A weak constitution.
(2) Defective vision.
(3) Impaired hearing.
(4) The existence of any congenital defect.

It is to be understood that this private examination is merely suggested to lessen the chances of disappointment, and that it is by no means intended to take the place of, or to influence in any way, the official examination.

On the subject of the standard of eyesight required for the Indian services, a pamphlet has been published under the authority of the Secretary of State in Council, by Messrs. Churchill and Sons, II New Burlington Street.

† A fee of 4*l.* is required, which can be paid by means of a stamp of that amount. Instructions on this point will be issued to candidates the day before the examination.

‡ Attention is invited to the appended Syllabus giving further details regarding the extent and character of the examination.

5. The course of study for candidates for the Indian Forest Service extends over about three years, divided into nine terms. During eight terms the candidates will prosecute their studies at the College, and during the remaining term they will visit, under suitable supervision, such British or Continental forests as may be selected for the purpose. Excursions will also be made for purposes of instruction, both during term time and during part of the vacations. The cost of all such tours or excursions is borne by the Secretary of State (see paragraph 9).

6. Each annual session begins in September, and is divided into three terms, with vacations of about four weeks at Christmas, two weeks at Easter, and eight weeks in the summer.

7. A charge of 61*l.* for each of the first eight terms and 60*l.* for the ninth term is made for each student. The amount must be paid terminally in advance to the Bank of England. Receivable orders, with full directions as to the mode of payment, will be forwarded from the India Office to the parents or guardians shortly before the fees fall due. A student will not be allowed to come into residence until his fee has been paid.

8. A deposit of 5*l.* is required to be paid by each student on admission to the College as caution money to cover charges incurred by him for damage to books, instruments, &c., or any College bills outstanding on leaving the College. Any balance over and above such charges will be repaid. This deposit is to be paid with the fee for the first term, making the total payment on that occasion 66*l.*

9. The foregoing payments cover all charges for tuition, board according to the College tariff, lodging with washing, and ordinary medical attendance while in residence at the College. When students are on tour and during the course of practical instruction, whether in Great Britain or on the Continent, the Secretary of State will defray the expenses of (1) board, lodging, and washing (the maximum expenditure on such account being 10*s.* per diem); (2) travelling expenses; and (3) fees to local Forest officers, &c.

Students are required to provide their own class books and drawing instruments. Drawing paper, drawing boards, and surveying instruments are provided by the College.

10. The prescribed course of study at present comprises the following subjects:—

I.—*Auxiliary Subjects.*

1. Geometrical Drawing.
2. Freehand Drawing.
3. Surveying.
4. Forest Engineering.
5. Accounts.
6. German.
7. Mechanics.
8. Physics.
9. Chemistry.
10. Geology and Mineralogy.
11. Entomology.
12. Botany.
13. Drill and Gymnastics.

II.—*Forestry, Theoretical and Practical, in all its branches.*

11. Every student is required to conform to the College rules, to exhibit due diligence in his studies throughout the course, and to give evidence of satisfactory progress in such manner as may be required, failing which, or in the event of serious misconduct, he will be liable to be removed from the College, or to be sent back from the forest tour, which may entail the loss of his appointment.

12. During the course of study, the proficiency of the students will be tested by periodical examinations, and on the termination of their studies there will be a final examination. Each student may also, at the discretion of the Secretary of State for India, be required to appear before the Medical Board at the expiration of the first year of residence at the College, and, should the result be unsatisfactory, he cannot claim to be allowed to complete the course.

13. The subjects enumerated in paragraph 10 are grouped in certain main branches of study,* and a fixed minimum of qualification is required in each branch and in the subjects taught during the forest tours, as well as a certain minimum for all branches taken together. Students who obtain these minima will receive the College diploma in Forestry.

14. Candidates who have obtained this diploma and are found to be of sound constitution and free from physical defects which would render them unsuitable for employment in the Forest Department (the final decision on which points will rest with the Secretary of State for India) will be appointed Assistant Conservators in the Forest Department of India in the order of their standing at the end of the final examination.

* For details, see Royal Indian Engineering College Calendar.

They will be allowed before leaving the College to choose the provinces in which they desire to be first employed according to the order in which they pass out of the College. But this choice can only be exercised according to the available vacancies in the different provinces, and on the understanding that officers are at all times liable to be transferred from one province to another at the pleasure of the Government of India.

15. Within a month of his nomination as Assistant Conservator, each nominee must sign articles of agreement describing the terms and conditions of his appointment; he must embark for India when required to do so by the Secretary of State, and will be provided with a free passage. Failure to embark at the stated time will, in the absence of satisfactory explanation, lead to forfeiture of appointment.

16. The pay of an Assistant Conservator of Forests will begin from the date of arrival in India. Probationers who acquit themselves creditably during their course at Cooper's Hill College will begin on a salary of Rs. 350 a month. It will, however, rest with the President of the College, in consultation with the Principal Professor of Forestry, to decide whether any of the probationers, though they have obtained the College diploma in Forestry, have failed to deserve that rate of initial salary. Such probationers, if any, will begin on a salary of Rs. 250 a month; and this difference of salary will continue until the first departmental examination is passed in India.

17. Promotion, leave, and pension will be regulated by the rules of the Service for the time being. A copy of the Regulations relative to these matters can be seen on application either at the Library or the Record Department of the India Office. The principal rules, however, are contained in the Abstract of the Civil Service Regulations, as given in the "India Office List" or the "India List," published respectively by Messrs. Harrison and Sons, 59, Pall Mall, and Messrs. W. H. Allen and Co., 13, Waterloo Place, S. W., either of which can be procured through any bookseller.

18. Every candidate before proceeding to India will be required to furnish to the President of the College satisfactory evidence of his competency in riding.

GENERAL RULES.

19. Chemical, physical and botanical laboratories, a forestry museum, a forest nursery, a library and gymnasium are attached to the College. Means are also provided for the practice of photography. Students making use of the laboratories are supplied with the needful apparatus.

20. The responsibility for the discipline and management of the College and for the superintendence of the studies is vested in the President under the control of the Secretary of State for India.

21. The students are distributed in divisions under personal charge of one of the Professors or Instructors selected by the President; such tutor being responsible for exercising the proper degree of personal supervision over each student in his division, and for conducting necessary correspondence with the student's parents or guardians.

22. Each student residing in the College is provided with a separate room, and with fuel and light, also with the necessary attendance. Furniture and bedding are supplied by the College, but students are required to provide their own towels and bed linen. Meals are taken in hall. Wine and beer are not included in the ordinary fare, but can be obtained from the College cellar at fixed prices.

23. A chapel is attached to the College which the students residing in the College are expected to attend, unless specially exempted.

24. Every student will be required to go through a course of gymnastics and also of military exercises, including the use of the rifle.

25. Students are required to wear academical dress under such regulations as may be prescribed from time to time.

STUDENTS NOT NOMINATED FOR THE INDIAN FOREST SERVICE, BUT DESIROUS OF OBTAINING A DIPLOMA IN FORESTRY FROM COOPER'S HILL COLLEGE.

26. Students not nominated for the Indian Forest Service may be received into the College as far as the available accommodation permits. Such students may pass through the course of instruction prescribed for the nominees of the Indian Forest Service as detailed above, or they may be permitted to participate in the instruction given in certain subjects only. On attaining the prescribed minima of marks in the several branches of study and in totals as laid down above, they will receive, as the case may require, either the College diploma in Forestry or special certificates showing in what subjects they have followed the instruction, and with what result.

27. Candidates who desire to be admitted under paragraph 26 may submit the necessary application at any time, but not later than the 15th day of June of the year named for admission, except with the special permission of the President. The application must be made on the prescribed forms, which can be obtained from the Secretary of the College.

28. Candidates whose applications are found satisfactory as to character and in other respects will be required to undergo an examination, to be held at the College, about the last week in June of the year for admission. The object of the examination will be to ascertain whether the candidate is qualified to follow the course of instruction with advantage (or certain parts of it, as the case may be). Candidates who do not come up to the required standard will not be admitted to the College.

The President may dispense with the whole or any portion of this examination in the case of a candidate who produces an University diploma or other similar certificate granted by a recognized examining body.

29. Candidates admitted to the College under paragraph 26, who propose to pass through the full prescribed course of study, will be required to pay the same fees in every respect as those paid by the nominees for the Indian Forest Service. Candidates who do not become resident and are admitted only to certain subjects of study, will be required to pay the fees which may be fixed in each special case in consideration of the extent of their studies. The candidates of both classes will be required to abide by the general rules of the College.

INDIA OFFICE,

June 1892.

FOREST EXAMINATION.

Syllabus showing the extent and character of the Forest Examination.

In a letter addressed to the Civil Service Commissioners on the subject of the examinations for admission into the Royal Military Academy, Woolwich, and the Royal Military College, Sandhurst, the Director-General of Military Education observes:—"The main object to be borne in mind with reference to the Entrance Examination is to secure a youth who has had a thoroughly well-grounded liberal education as an English gentleman. Any curriculum which renders those who are unsuccessful unfit for other professions is greatly to be deprecated." The Regulations for the Forest Examination, which follow the lines of the Sandhurst Examination, are intended to provide a test that the candidates have received such an education as is indicated in these words. By these Regulations certain of the subjects specified are prescribed as obligatory for all competitors, while in the choice of the subjects described as optional allowance is made for varieties of taste and inclination in each candidate. In view of the influence which the Regulations must necessarily exercise on the education of candidates for admission to the public service, the Civil Service Commissioners deem it expedient to specify with more fullness than in the Regulations themselves the character of the examination which the candidates will be called upon to undertake.

CLASS I.

(Obligatory Subjects.)

Mathematics.—The extent of the examination will be as defined in the Regulations.

English Composition.—An Essay to be written on one of several subjects specified by the Civil Service Commissioners on their examination paper.

German.—There will be translations of unseen passages from German into English and from English into German; the knowledge of pronunciation will be tested by dictation and the *vivá voce* examination. The passage for translation will be taken mainly from standard authors (Schiller, Lessing, Alexander v. Humboldt, Ranke, &c.), and a few simple questions may be asked on the passages set, as to the structure and character of the language, and allusions of obvious and general interest.

CLASS II.

(*Optional Subjects.*)

Higher Mathematics.—The extent of the examination will be as defined in the Regulations.

Latin.—Passages will be set for translation into English selected from the authors usually read in schools. Passages from English authors will be given for translations into Latin prose and verse, but candidates will be allowed in the place of verse composition to answer questions of a simple character which will test whether they possess a fundamental knowledge of the grammar of the language and such an elementary acquaintance with Roman History as is required for the intelligent study of the books they have read.

Greek.—Passages will be set for translation into English from the authors usually read in schools, and in other respects the examination will proceed on the same lines as in Latin.

French.—The passages for translation will be taken from standard authors (Corneille, Madame de Sévigné, Guizot, Taine, &c.), and in other respects the examination will proceed on the same lines as in German.

English History.—The general paper in this subject will test whether the candidates are accurately acquainted with the facts of English History, and also possess an intelligent knowledge of the meaning of the facts. The paper on the fixed period will, of course, require from the candidates more minute knowledge than the general paper.

Botany, Chemistry, Physics, Physical Geography, and Geology.—The standard of examination in these subjects will be such as may be reasonably expected from the education given at schools possessing appliances for practical instruction, such as a laboratory, &c. A considerable portion of the marks will be allotted for the proficiency shown in the practical part of the examination.

GENERAL.

Handwriting.—In estimating the papers of candidates, a limited number of marks, namely 100 out of the maximum allotted to each subject, is held to be assignable for handwriting.

MILITARY.

The 7th November 1892.

No. 244.—*Notification.*—The following notice issued by the Government of India is published for information :—

Notice of International competition.

Her Britannic Majesty's Secretary of State for India having decided to offer rewards for the production of designs and models best adapted for mule carts for the transport use of the British Army in India after practical test in India of a full sized specimen hereby announces the following premia and conditions of award for a competition open to all nations :—

1st prize—750 (seven hundred and fifty) pounds sterling.

2nd prize—500 (five hundred).

3rd prize—375 (three hundred and seventy-five).

4th prize—250 (two hundred and fifty).

5th prize—125 (one hundred and twenty-five).

2. The award of the above premia will be entirely entrusted to a jury composed as below:—

President.

The Quartermaster-General of the Army in India.

Members.

An officer detailed by the Director-General of Ordnance in India,

An officer detailed by the Commissary-General-in-Chief in India,

and three technical members selected from practical cart or carriage builders, wheelwrights, managers of railway carriage works, or from such unofficial artisan experts as may be appointed by the Government of India.

The President to have the casting vote.

The decision of the jury in any matter whatever connected with the award of premia to be considered final, and equally binding upon competitors and upon the Government of India.

Any premium to be paid in India if desired, in rupees, at the exchange prevailing on the date of the award.

3. The Secretary of State for India guarantees the payment of the premia on the condition that the jury certify that on the date fixed for closing the competition at least 25 (twenty-five) designs have been received from as many *bonâ fide* different competitors. It will be, however, entirely within the power of the jury to withhold such premia as it considers not sufficiently deserved by the merits of the designs.

4. The question of cost being of the highest importance, the designs should give the estimated price in pounds sterling, or rupees, of a single cart delivered free on board in London or at Bombay, Calcutta or Allahabad.

As a guarantee of good faith on the part of the competitor as regards estimated cost, he will, if recommended for a premium, receive in the first instance only one-half of such premium immediately on its award. He will, however, only receive the same proportion of the other half as represents the proportion by which he may have under-estimated the actual cost of the cart.

It is left to the jury to ascertain by tender in the open market, or by such other means as it considers suitable, what would be the cost of the cart to Government, and to make its award accordingly.

For example, a competitor wins the first premium of £750 for a design which he estimates to cost £20 per cart. He will at once receive £375. The jury will then take such steps as it thinks advisable to determine the true market value of the cart, and, having found it to be £30 or 50 per cent. more than the estimate, would give the designer a premium of £375, plus 50 per cent. on £375, or a total of £562½. If, however, the true market value agreed with the estimate, the competitor would receive the total premium of £750.

5. The object desired to be attained by this competition is the production of a design, accompanied in all cases by a working model, for a military transport cart adapted to conditions which make the use of interchangeable metal parts for all important portions of the cart absolutely indispensable.

6. Intending competitors wishing for the fullest details as to the kind of cart required will be supplied with further instructions on application to the Director of Stores, India Office, Westminster, London, S. W., or to the Secretary to the Government of India, Military Department, Calcutta, British India.

Foreign competitors may obtain further particulars on application to the Secretaries of Her Britannic Majesty's Embassies or Legations at their respective capitals, but are recommended to apply, as notified above, to London or Calcutta.

7. The designs and models framed in needful detail should be sent direct to the Secretary to the Government of India, Military Department, Calcutta.

No designs or models reaching Calcutta later than the 30th June 1893 will be allowed to compete. The time of transit for parcel post from London to Calcutta may be taken at 24 days.

RESOLUTION.

The Reports on the measures adopted for the extermination of wild beasts and venomous snakes are now submitted annually in accordance with the orders issued in paragraph 9 of the Resolution of the Government of India in the Home Department, No. 40—2374-2386, dated the 4th December 1890. The statistics for the preceding decade were examined in detail in that Resolution. In the present Resolution the Government of India will briefly review the results reported for the year 1891.

2. The mortality caused by wild animals in the different Provinces is compared with that reported during the previous year in the following figures :—

Province.	Number of persons killed during: 1890.	1891.
Madras	196	279
Bombay	47	80
Bengal	1,301	1,584
North-Western Provinces and Oudh	228	236
Punjab	31	65
Central Provinces	368	310
Burma	36	121
Assam	201	200
Coorg	0	3
Hyderabad Assigned Districts	26	29
Ajmere and Merwara	6	4
Total ...	2,440	2,911

In the previous year the record of the number of persons killed by wild beasts showed a decrease from 2,724 in 1889 to 2,440. The Government of India regret to observe that there has been a considerable increase during the year under review. This result is due partly to the fact that the deaths from this cause reported from Upper Burma have been included in the returns for the first time during the year under review, but chiefly to the great increase in the mortality reported from the Lower Provinces of Bengal. A considerably larger number of deaths were returned from the Madras Presidency also. The Provinces in which the loss of life was highest in proportion to population were, as in the previous year, Assam (1 to 27,120), the Central Provinces (1 to 34,757), and Bengal (1 to 44,765). The mortality was again lowest in proportion to population in the Punjab (1 to 320,108) and in Bombay (1 to 235,335). The average result for all the Provinces taken together is a mortality of one person to every 74,697 of the population calculated according to the census of 1891 as compared with one person to every 88,392 in the previous year.

3. There was a marked increase in the number of persons destroyed by tigers and leopards during the year; 979 deaths were caused by tigers and 314 by leopards in 1891 as compared with 798 and 179 in 1890. In Bengal the number of persons killed by tigers rose from 350 to 492. In the Lohardaga and Hazáribágh districts alone there were 205 deaths. The Local Government explains this as follows :—"This mortality is reported to be due to a family of man-eating tigers which haunt the neighbourhood of Tandwa in Hazáribágh. Every effort has been made to secure the destruction of the animals, but the Commissioner reports that the repeated attempts of local shikaris, encouraged by the offer of a reward of Rs. 200 for each tiger, and expeditions undertaken by European sportsmen have been alike unsuccessful. A reward of Rs. 100 has now been offered for every tiger killed in the immediate neighbourhood of Tandwa and a reward of Rs. 200 for every tiger destroyed over a human kill." The number of persons killed by leopards in Bengal rose from 71 in the previous year to 179, the increase being due to the ravages of a man-eating leopard in the Rajshahi district which is said to have caused 96 deaths. A reward of Rs. 100 was offered and this animal has been destroyed since the close of the year. The increased mortality in the Madras Presidency appears to have been mainly due to man-eating tigers in the Ganjam and Vizagapatam districts. Special rewards of Rs. 500 and Rs. 200 have been offered under the orders of Government for two notorious man-eaters. The substantial decrease in the mortality reported from the Central Provinces is stated to be due to the death or destruction of several man-eating tigers and to the extermination of the pack of wolves referred to in last year's report The Government of India are glad to observe that the Chief Commissioner has found that the system of offering special rewards to effect the destruction of animals known to be specially dangerous has worked with success.

4. The number of cattle returned as destroyed by wild animals was 70,816 compared with 68,483 in the previous year. Of these deaths, 53,615 or 76 per cent. are attributed to tigers and leopards. These figures, however, are of doubtful accuracy and further comment is needless with regard to them.

5. There was a noticeable increase in the number of wild animals destroyed, which rose from 14,755 in 1890 to 16,518. This was accompanied by a rise from Rs. 96,470 to Rs. 1,06,478 in the total amount paid as rewards for their destruction. In Bengal, however, the number of animals destroyed fell from 5,311 to 4,882, while the amount of rewards

remained almost stationary; only 1,077 tigers and leopards were killed in this Province compared with 1,167 in the year before. A large increase is reported in the number of wolves destroyed in the North-Western Provinces and Oudh (1,688 to 1,928). In reviewing the last year's Reports the Government of India insisted (among other measures) on the importance of providing for the timely offer of special rewards in the case of wild animals which have begun to take human life or to destroy cattle, and it was suggested for consideration whether Revenue and Police officers in the outlying parts of a district might not be authorized under certain restrictions to grant rewards. It is satisfactory that these instructions have been generally kept in view by Local Governments and Administrations, especially in those Provinces where the loss of life is caused by wild beasts is largest proportionately to population. In the Central Provinces and Assam the amount of rewards special and general, paid for the destruction of wild animals increased considerably. In Bengal additional facilities have been afforded to the people for obtaining rewards, and all sub-divisional officers have been authorized to grant rewards on application made to them. In the North-Western Provinces and Oudh the Local Government has empowered selected Tahsíldárs to disburse rewards. In Burma similar power has been conferred upon township officers. In Assam all Tahsíldárs and Mauzadárs selected by the Deputy Commissioners have been authorized to grant certificated on which rewards are to be paid. In the Central Provinces the Chief Commissioner has in the previous year authorized Deputy Commissioners to empower Tahsíldárs and Station-house officers to grant rewards. From the reports submitted next year it will be possible to pronounce an opinion as to the extent to which these measures have been attended with success.

6. The number of gun-licenses returned as held under the Indian Arms Act free of cost for the destruction of wild animals has largely increased—from 59,051 in 1890 to 69,133. The increases occurred chiefly in the Madras and Bombay Presidencies and the North-Western Provinces and Oudh. It is not clear, however, that the last three columns in the statement appended to this Resolution are correctly filled in in all Provinces. They should show only the number of guns for which licenses are issued free of charge in Form XI of the forms prescribed in the Arms Act Rules for the express purpose of destroying wild animals or protecting crops. The ordinary sporting licenses in Form VIII, which are issued in large numbers on the payment of a trifling fee, should not be included in the statement.

7. The total number of persons killed by snakes during the year was 21,389 as compared with 21,361 in 1890. As usual, the greater part of the mortality occurred in Bengal and in the North-Western Provinces and Oudh, 47 per cent. of the total number of deaths being reported from the former and 25 per cent. from the latter Province. The large increase in the mortality returned from Burma is due to the inclusion for the first time of the figures for Upper Burma, where 132 deaths occurred.

The details of the mortality under this head in each Province during the last two years are compared below:—

Province.	*Number of persons killed by snakes during:* 1890.	1891.
Madras	1,424	1,433
Bombay	1,075	1,187
Bengal	10,483	10,031
North-Western Provinces and Oudh	5,798	6,013
Punjab	834	799
Central Provinces	1,041	1,099
Burma	223	418
Assam	214	209
Coorg	0	4
Hyderabad Assigned Districts	191	145
Ajmere and Merwara	78	51
Total ...	21,361	21,389

The Provinces which showed the greatest loss of life from snake-bite in proportion to population were Bengal (1 to 7,069), the North-Western Provinces and Oudh (1 to 7,084), and the Central Provinces (1 to 9,804). The lowest mortality (excluding Coorg) is reported from the Punjab (1 to 26'041), Assam (1 to 25,953) and Madras (1 to 24,837). The net result is that one person to every 10,166 of the population died from snake-bite during the year as compared with one person to every 10,155 in 1890.

8. The total number of cattle reported to have been killed by snakes was 3,658 as compared with 3,948 in 1890. But these figures are obviously unreliable. In Bengal and the North-Western Provinces and Oudh for instance, where the human mortality from the same cause is so great, only 409 and 210 head of cattle are returned as having been killed by snakes in 1891.

9. The total number of snakes returned as destroyed during the year fell from 512,099 to 85,159, and the amount of the rewards paid for their destruction from Rs. 18,914 to Rs. 9,163. This falling off is almost entirely due to the figures returned from the Bombay Presidency, where only 2,803 snakes are shown to have been killed against 406,092 in the previous year, and only Rs. 44-12-6 were paid as rewards as compared with Rs. 7,136-2-2 in 1890. The Bombay Government have directed special inquiry into these extraordinary results, and the Government of India will await the explanation. At the same time there can be little doubt that the returns for previous years were open to much suspicion; in 1890, for instance, four-fifths of the total number of snakes returned as killed in British India were reported to have been killed in the Bombay Presidency, and probably a very large number of harmless snakes were included in the returns. The Government of India will also be glad to learn the reasons which have led to the reduction of the rate of reward for *phursas* in the Satara district from six pies (which seems a sufficiently low limit) to one pie; a reward of one pie cannot have any effect and might as well be discontinued.

10. The question of the measures which should be adopted for reducing the loss of life caused by venomous snakes is one of considerable difficulty. The Government of India are aware that an organized system of rewards everywhere has been advocated by a high authority on the subject, but they are constrained to adhere to the view expressed in their Resolution of the 4th December 1890 that experience has shown that no system of granting rewards for the destruction of snakes is likely to have any appreciable effect on the mortality from snake-bite. At the same time the Governor-General in Council does not desire to direct the discontinuance of rewards for snakes destroyed, but will leave it entirely to Local Governments and Administrations to decide whether they should be granted either generally or in particular localities. The North-Western Provinces and Oudh appear to be the only Province in which rewards for snakes have been completely discontinued. His Honor the Lieutenant-Governor suggests that as rewards are not now paid, and it is thereforeimpossible to report the number of snakes destroyed, these statistics should in future be excluded from the returns. The Government of India are, however, unwilling to sanction this proposal. As rewards are paid in other Provinces, it is desirable that some record should be kept of the number of snakes for the destruction of which payments were made; and even in the North-Western Provinces and Oudh, although the system of rewards has been generally discontinued, it may be thought desirable at any time to revive it in particular municipalities or other areas in which it is considered that the payment of rewards is likely to prove efficacious. While on this subject, the Government of India desire again to invite the attention of Local Governments and Administrations to the suggestion at the end of paragraph 8 of the Resolution of the 4th December 1890 that pictures of poisonous snakes should be circulated in the districts where these reptiles are common, so that there may be no difficulty in identifying those snakes which are poisonous.

11. In the Resolutions of 4th December 1890 and of 15th October 1891 the Government of India suggested that steps should be taken to remove the jungle and undergrowth in and around villages, both for sanitary reasons, and also with the object of destroying the cover for snakes in inhabited sites, where they are most dangerous to human life. It is too early to expect any definite results from the trial of the measure, but the Government of India desire to express their satisfaction that the matter is receiving attention at the hands of Local Governments and Administrations.

12. The usual statement showing the results reported during the year under review is appended to this Resolution.

ORDER.—Ordered that a copy of this Resolution be forwarded to Local Governments and Administrations for information and guidance, and that it be published in the *Gazette of India* for general information.

Also that a copy be communicated to the Foreign Department.

MILITARY.

The 15th December 1892.

No. 263.—*Leave.*—Lieutenant C. Kirkpatrick, 1st Punjab Volunteer Rifle Corps, is granted leave of absence for six months with effect from the 5th of December 1892 or such subsequent date as he may avail himself of it.

The 21st December 1892.

No. 265.—*Notification.*—The following instructions issued by the Government of India are published for information in continuation of *Punjab Gazette* Notification No. 244, dated 7th November 1892 :—

Instructions for competitors submitting designs and models for a two-mule army service cart.

1. The premia offered are for the preparation of such drawings and models showing details to scale, and of such specifications as shall enable the jury to form an accurate judgment of the merits of the different cart designs proposed. On the selection of the six best designs and models, a full-sized specimen cart of each will be constructed under the orders of the Government of India; and after trial the prizes detailed in the Notice of International Competition will be awarded.

2. Such a design would, *ipso facto*, have a great advantage, as would admit of the cart proposed being selected by the jury, and without further reference being readily

constructed by the ordinary agency of the Government of India. In other words, credit will *pro tanto* be given for a simple design, only requiring such material, plant, and workmanship as are available in a well fitted Government arsenal.

3. Where, however, the designer foregoes the above advantage, and proposes the use of materials, plant, and workmanship only to be obtained by special agency or in special localities, he must clearly indicate the arrangements under which the proposed cart could best be constructed. Whilst the necessity for special arrangements will in no way debar a design from a premium, any proposals tending to a monopoly will in themselves be considered a disadvantage.

4. The object sought is a design for a military transport cart for a mountainous country with absolutely no local resources in the way of skilled labor or constructive material. The few existing unmetalled roads are steep, narrow, and rough. Carts would further be largely employed on unbridged and unmetalled tracks newly opened along hill sides and stony river beds to meet the exigencies of military operations. The roughest handling is unavoidable. With abnormally dry air, scorching sun, freezing wind, and a temperature varying from 185° above to 15° below zero (of Fahrenheit), the consequent shrinking and warping of wood, however well it may be seasoned, absolutely debars the use of that material except, perhaps, in the poles or shafts, floor boards, and sides. Further, the use of wood, even in such secondary parts, is objectionable, as it is liable to be stolen and burnt as fuel. Teak is the best wood for sides or floor boards. Poles or shafts, if of wood, might be well supported by iron plates and bolts.

5. The cart, therefore, with the possible but undesirable exceptions noted above, must be entirely made of metal or of combinations of metals. As the effects of rough handling and jolting on loose joints and fittings, and bad workmanship generally, combined with the difficulty of making efficient and timely repairs, are the main causes of carts breaking down, machine boring and turning with perfect fit and interchangeability of parts is absolutely indispensable, so that every broken part in any cart could be immediately replaced by a similar part, without shaping, fitting or skilled labor whatever. Every designer should specify the standard of accuracy, $\frac{1}{64}$, $\frac{1}{32}$, $\frac{1}{16}$, inch, &c., he could guarantee in interchangeable parts. The effect upon the prime cost due to guaranteeing such different classes of workmanship should be fully specified.

6. Whilst no restrictions are placed upon the use of any metals whatever, designers are warned that whereas mild steel wrought, cast, and malleable cast iron, copper and brass are familiar to native workmen, these materials are more suitable than special qualities of steel, phosphorous, and Uchatius bronze, &c., in such parts as tyres, forgings, boxes, &c., which it may require specially skilled labor to manipulate without injury from overheating or burning.

7. As the merits of a design will be largely judged from its prime cost, competitors will consider how far light and strong but possibly very expensive metals should be used in place of commoner material, having especial regard to the importance in the matter of durability of the cart itself not being unduly light with reference to the load it has to carry. In this connection 656 English pounds as a maximum, and 492 lbs. as a minimum are indicated as generally suitable limits of weight for an empty cart This remark, however, in no sense need restrict designers' ingenuity in devising a lighter cart if of sufficient strength.

8. The cart to have only two wheels to be provided with a brake or drag and to be drawn by two mules. The standard load to be carried is fixed at 656 lbs. (six hundred and fifty-six English pounds). The pole system of harnessing suspended from a curricle bar, and adaptable to mules varying from 13·1 to 13·3 hands in height, or from 40 to 42 English inches at the withers, is preferred to the system of shafts and collar-bars, which is not, however, excluded. The mules to be led by a man on foot, a driving seat being inadmissible. No kind of overhead covering is necessary. Laden carts will practically never be driven faster on level ground than at four miles an hour.

9. Meshes are allowable in the floor and sides of the cart, which need not be closed throughout, whilst the sides may be left open at both ends or merely closed by a chain, the smallest size of package to be provided for in the mesh is 20″ by 7″ by 8″. The most convenient height of cart-floor for the loading of military stores is from 2′ 9″ to 3′ 3″, according to the size of wheel. For meshes in the floor and sides hoop-iron, diagonally bracing the cart, has been found suitable.

10. As a guide to dimensions convenient for army purposes, but which need not, however, be necessarily adhered to, an extreme width of 4′ 6″ over tyres of wheels, and outside diameter of wheel of from 4 to 5 feet, and a width of tyre of from 2½ to 3 inches, is suggested. For clear room for packing in the body of the cart the cubic space averaged by 5′ 6″ in length, 3′ 3″ in width, and 1′ 9″ in height would be generally suitable. Although the army cart now in use, which is chiefly made of wood, is a very unsatisfactory one, it may be useful to competitors to know that its average cost and its weight when empty is Rs. 190 (one hundred and ninety) and 615 (six hundred and fifteen) English lbs. respectively.

11. Although it is not debarred, the easing of the draught by springs and by bent axles providing for higher wheels is not, in the interests of simplicity, generally recommended. Where springs are proposed, the alternative cost of a similar cart without springs might with advantage be given. The solidity, which under rough handling is scarcely attainable without sufficient weight and mass in the cart itself, should not be sacrificed to lightness and appearance. For similar reasons spider wheels, as being further too narrow in the tyre for sandy soil, are not recommended.

12. A grease box, spanner, hammer, and such small stores as may be necessary, have to be suitably provided for and carried on the cart. The proposed lubricant should be mentioned. Where washers, linch-pins, bolts, &c., are liable to shake out and be lost, they must be attached to the vehicle. As carts will often be loaded in railway trains by night, special importance attaches to ease and rapidity in dismantling and re-erecting of the carts, and to facilities for the compact railway packing of constituent parts. This would indicate the use of removable poles or shafts. Great stress will be laid upon facilities for tightening up parts on the march, and for replacing tyres, spokes, &c., with ease and rapidity and without skilled labor.

The models, the proper handling of which, if at all complicated, should be duly explained, will be expected to most fully illustrate the facilities for interchangeability, and for repairing, tightening, and replacing different parts.

13. Each design and model, in addition to the fullest specification, description and estimate of cost, including that of two coats of best red lead as priming, and one of specified finishing paint should, besides giving the total weight, be accompanied by a measurement book showing by calculation the weight and cost of each constituent interchangeable part. This will enable the jury to check the estimate, and to decide upon relative merits with reference to the cost of providing certain numbers of spare interchangeable parts, such as wheels, axles, poles, &c., on different systems, to replace breakages with each organized unit of cart transport. Bolts, nuts and screws to be of standard English pattern, Whitworth or others.

14. Each designer will state in describing his cart whether he is willing to enter into a contract for its supply, and, if so, within what time and at what cost he is prepared to furnish a single specimen cart, 12 carts, 100 carts, or from 500 to 2,000 carts, free on board in London, or delivered in Calcutta, Bombay or Allahabad.

15. Each specification, drawing and model must be prominently marked by a motto or device, and be accompanied by a sealed cover to be opened after the award of the premia, and to contain the full name and address of the competitor. Successful competitors will be directly notified of their success by letter, and on the premia being awarded, the names and addresses of the successful competitors, and the devices or mottoes on all the unsuccessful designs received, will be duly notified in four successive weekly issues of the official *London Gazette* and *Gazette of India*. All designs and models will remain unconditionally the property of the Government of India, which will obtain the full right to manufacture carts wholly or partially after one or all of the patterns proposed.

16. All specifications, descriptions, letters, &c., must be written on foolscap paper. No drawing will be accepted except on sheets of strong tracing cloth, of a uniform size of 24 inches by 18 inches. General drawings to be on a scale of 1 (one) inch to the foot, and drawings of details on 2½ (two-and-a-half) inches to the foot. Models, which must be thoroughly working models, are to be made on the scale of 2½ (two-and-a-half) inches to the foot. All the letters, documents, tracings, drawings and models appertaining to any one design to be securely packed, and sent post paid by overland parcel post in a solid cover and in a box addressed to—

The Secretary to the Government
of India, Military Department,
Calcutta,
India.

Different letters and boxes belonging to the same competitor should be clearly marked "Cart competition," with the designer's distinctive motto or device on the upper left hand corner, so as to prevent confusion and mistakes.

17. The English language, although not obligatory, as German and French may be used, will necessarily have an advantage in the competition. English measures, weights and prices are alone admissible in the specifications, drawings and models.

18. The strictest adherence to the details laid down as above for the conditions of the competition is earnestly invited.

2. All future enquiries from intending competitors in India should be addressed to the Quartermaster-General in India.
